## ARCAS T8 SMD-LED Tubes

### ARCAS T8 SMD-LED Tube 60cm

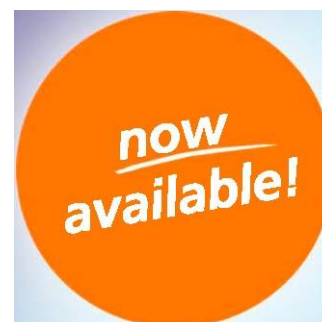

56 energy-saving SMD-LED chips provides intensive light with 950 lumens while consuming no more than 10 watt.

### ARCAS T8 SMD-LED Tube 120cm

This SMD-LED Tube consumes only 21 watt while providing with 128 SMD-LED chips 2100 lumens.

### ARCAS T8 SMD-LED Tube 150cm

In this case 160 energy-saving SMD-LED chips guarantees the luminous power of 2500 lumens while consuming only 24 watt. The housing is fitted with a clear cover.

Arcas T8 SMD-LED Tubes are the ideal solution to lighten large rooms efficiently. Thereby more than 70% of energy costs will be reduced compared with conventional fluorescent tubes and so the CO<sub>2</sub> emission of the Arcas SMD-LED Tubes is decreasing. Furthermore LED Tubes are environmentally friendly, because they contain no heavy metals. The housing, consisting of polycarbonate and aluminium, is shock-resistant. Other advantages: there is no flaring and glimmering, no power-up delay - full brightness immediately, furthermore a high beam angle of 120°.
