

B 10 Electra

Art. Nr. 25300 (1 Phase - 220 V)
Art. Nr. 25301 (1 Phase - 110 V)

Designed for beveling and deburring parts, internal and external radii and holes.

Specially designed for producing bevels and welding preparation.

Durable and stable machine design without compromises.

Thanks to the special design of the cutting head you will you save ½ tips at reductions of up to 8 mm / 0.31 in of the bevel width.

- Scale for accurate bevel size adjustment.
- For beveling and deburring steel, aluminium and other materials.
- Replaceable head for changing bevel angle.
- Handheld powerful equipment.
- Electronic Speed Control.
- Edge rounding function, preparation before surface treatment.
