

## Q&A

### Regarding Bystronic's acquisition of the Coherent Gilching

We have put together answers to the questions we hear most from you regarding the recent ownership change from Coherent Gilching to Bystronic Rofin. The short version: no changes in your day-to-day.

**Q: What has happened?**

Bystronic, a leading Swiss company in sheet metal processing and laser technology, completed its acquisition of the micro laser and marking unit from Coherent Corp. on January 30, 2026. The acquired business now operates under the name Bystronic Rofin GmbH, headquartered in Gilching near Munich.

**Q: What does this mean for me?**

Masentia transitions with the acquisition and now distributes laser products from both Bystronic Rofin and Coherent, as well as UNITED MACHINING. We remain your local partner for sales, service, and support — nothing changes in how you work with us.

**Q: Will my contacts change?**

No. You keep the same contacts at Masentia, with the same phone numbers and email addresses. Our sales and service teams are unchanged. You can see your contacts on page 3.

**Q: What happens with orders I have already placed?**

All your existing orders, warranties, and service agreements remain valid and will be honored according to their original terms.

**Q: Where do I place new orders?**

You continue to place orders through Masentia, exactly as you do today.

**Q: Are my service agreements still valid?**

Yes. Your existing service agreements remain fully in effect. You will not experience any disruption.

## Q&A

### Regarding Bystronic's acquisition of the Coherent Gilching

**Q: Are existing quotes still valid?**

Yes. Any quotes you have received remain valid until their stated expiration date.

**Q: What about spare parts and technical support?**

You continue to get spare parts and technical support from Masentia as before. All employees and know-how from the Coherent Gilching business have transferred to Bystronic, so the expertise behind your products remains the same.

**Q: Will the product range change?**

The products you know – including laser marking, micro-welding, and cutting systems – remain available. The technology behind the machines remains the same, but you will experience changes in how the products look.

**Q: Who is Bystronic Rofin?**

Bystronic is a well-established Swiss company and leader in sheet metal and tube processing. They have evolved from a machine manufacturer into a full solutions partner. The legacy Bystronic business unit in the Nordic region will also continue unchanged as before.

**Q: Where can I find more information?**

Reach out to your usual Masentia contact – please see the next page for contact information or visit [www.bystronic.com/bystronic-rofin](http://www.bystronic.com/bystronic-rofin)

We are always happy to help.
