

TWIN TOWER NITROGEN GENERATOR

NS-100 / NS-200 / NS-300

Technical Data

- 7,5 or 10 bar
- ≤ -40
- 110-230 V / 50-60Hz
- PED

Features & Benefits

- Feed air connection: 2" BSP
- Noise Level: Below 75 dB(a)
- Power consumption: 0,3 kW
- Feed Air ISO 8573 Class: 1.4.1
- Flow control and oxygen analyzer (option)

The NS generators extract the available nitrogen in the ambient air from the other gases by applying the Pressure Swing Adsorption (PSA) technology. During the PSA process compressed, cleaned ambient air is led to a molecular sieve bed, which allows the nitrogen to pass through as a product gas, but adsorbs other gases. The sieve releases the adsorbed gases to the atmosphere, when the outlet valve is closed and the bed pressure returns to ambient pressure. Afterward, the bed will be purged with nitrogen before fresh compressed air will enter for a new production cycle. In order to guarantee a constant product flow, the NS nitrogen generators use modules of two molecular sieve beds, which alternatively switch between the adsorption and the regeneration phase. Under normal operating conditions and with correct maintenance the molecular sieve beds will have an almost indefinite lifetime.

Model	Nitrogen Production Flow (Nm ³ /h)																		
	Oxygen Content	5 %		3%		2%		1%		0,5%		0,1%		100 ppm		50 ppm		10 ppm	
Feed Air Pressure	7,5	10	7,5	10	7,5	10	7,5	10	7,5	10	7,5	10	7,5	10	7,5	10	7,5	10
