

# TECH TOUR

Invitation to open day at four high-tech companies in Billund  
on April 11, 2024, 9.00-16.00

Take a look inside the “cockpit” of four leading high-tech companies and get a unique experience.

DAVINCI 3D is a leading company within Engineering and 3D print. We have a large high-tech production and 3D print all from a few prototypes to large production series in high quality.

HN Group is a specialist in injection molding, thermoforming, and development of solutions in plastics. We advise, develop, and produce solutions that help and improve our customers' processes and competitive advantages.

Stansomatic is your strategic partner for stamping metal and hybrid parts. We offer tool design, prototypes, tool manufacturing, insert molding and laser welding.

Zebicon is a specialist in 3D scanning, CT scanning, and photogrammetry. We offer part measurement as services and distribute 3D software and high-end metrology systems to the Danish market.
