

SEEN IRIS 860 sensor

Transforms your existing high-vis into part of an active detection system

**SIMPLE
EFFECTIVE
AFFORDABLE**

IRIS 860 sensors make pedestrian detection easy by detecting the reflective tape on high-vis safety vests and markers. If a pedestrian enters the critical risk zone they and the driver receive an audible alert.

Active detection of existing PPE

Transforms your day/night PPE from passive to active

No irrelevant detections

Only detects people or objects tagged with reflective tape

Reliable detection indoor/outdoor

Tolerant of dust/dirt/water/darkness/glare/shock/vibration/IP67

Alerts both driver and pedestrian

Strong audible alert promotes positive behaviour change

Easy to install on any machine

Auto electrician install. DIY settings with free app. No IT integration

Low cost of ownership

Affordable to buy, no ongoing cost, no maintenance
