### Standalone and turnkey solutions

EGATEC machine series offer a modular and compact solution for End Of Line.

The competitive line within internal transport offer robust and compact solutions, ensuring long life and low maintenance costs. All standard modules are specially adapted to each application providing

#### **PACKAGING**

The full range of packaging machines provide professional packaging solutions that are reliable and require minimum of maintenance. The modular system makes it easy to adapt our standard solutions to your individual needs and requirements.

The palletizing solutions ensure fast, secure and efficient palletizing no matter how small or large your application is. The solutions offloads employees regarding repetitive work and simultaneously protects from heavy and awkward lifts.
