

3PL

Third Party Logistics

strömberg

Our focus is your 3PL challenges

Jenny Molin, CEO

Strömberg – This is who we are

Strömberg is one of the largest and most comprehensive companies in the 3PL industry. We provide services in logistics, warehousing, printing, and distribution worldwide. Our company is represented with warehouses in the Nordic region.

Strömberg is a privately owned company founded in 1982. Today, the group has about 120 employees. We ensure and automate our customers' needs for storage, picking and packing, incoming and outgoing goods, campaign management and solutions for printing and communications.

To live up to our 3PL commitments, we have invested in modern equipment, efficient management systems, customised processes, patented WMS systems and ISO-certified quality systems.

On the journey towards fulfilling our vision, we are constantly guided by our company's core values. Strömberg's corporate culture is characterised by care, courage, structure, and always finding the best solution – a solution that creates value, both for your business and for us at Strömberg

Our goal is to be part of the beating heart of your company, and our vision is to be your obvious choice of partner. We are Strömberg.

Our fantastic team
supports you all the way

3PL – This is what we do

Strömberg provides 3PL solutions (third-party solutions) to a large number of customers.

To manage the logistics operations, Strömberg has an order system that has been developed internally. The system handles the entire logistics flow, such as arrival registration, inbound and outbound deliveries, inventory management, order management, delivery notes and invoices, reports and statistics, as well as accounts and client funds.

Strömberg's logistics system integrates well with all commercially available ERP systems. This facilitates orders and sales transactions, without the need for manual actions. The system applies access controls, managed through a login, or "single-sign-on" solution.

For the perfect 3PL solution, Strömberg's own IT department develops and adapts our tools and support functions in all our business areas. We have developed our own API solution for integrating your ERP system with Strömberg's WMS system. We take on the leading role and ensure your company's needs for efficient solutions are met, for all your logistics and customer communications.

We love what we do, and we do everything we can to show it!

3PL – This is what you get

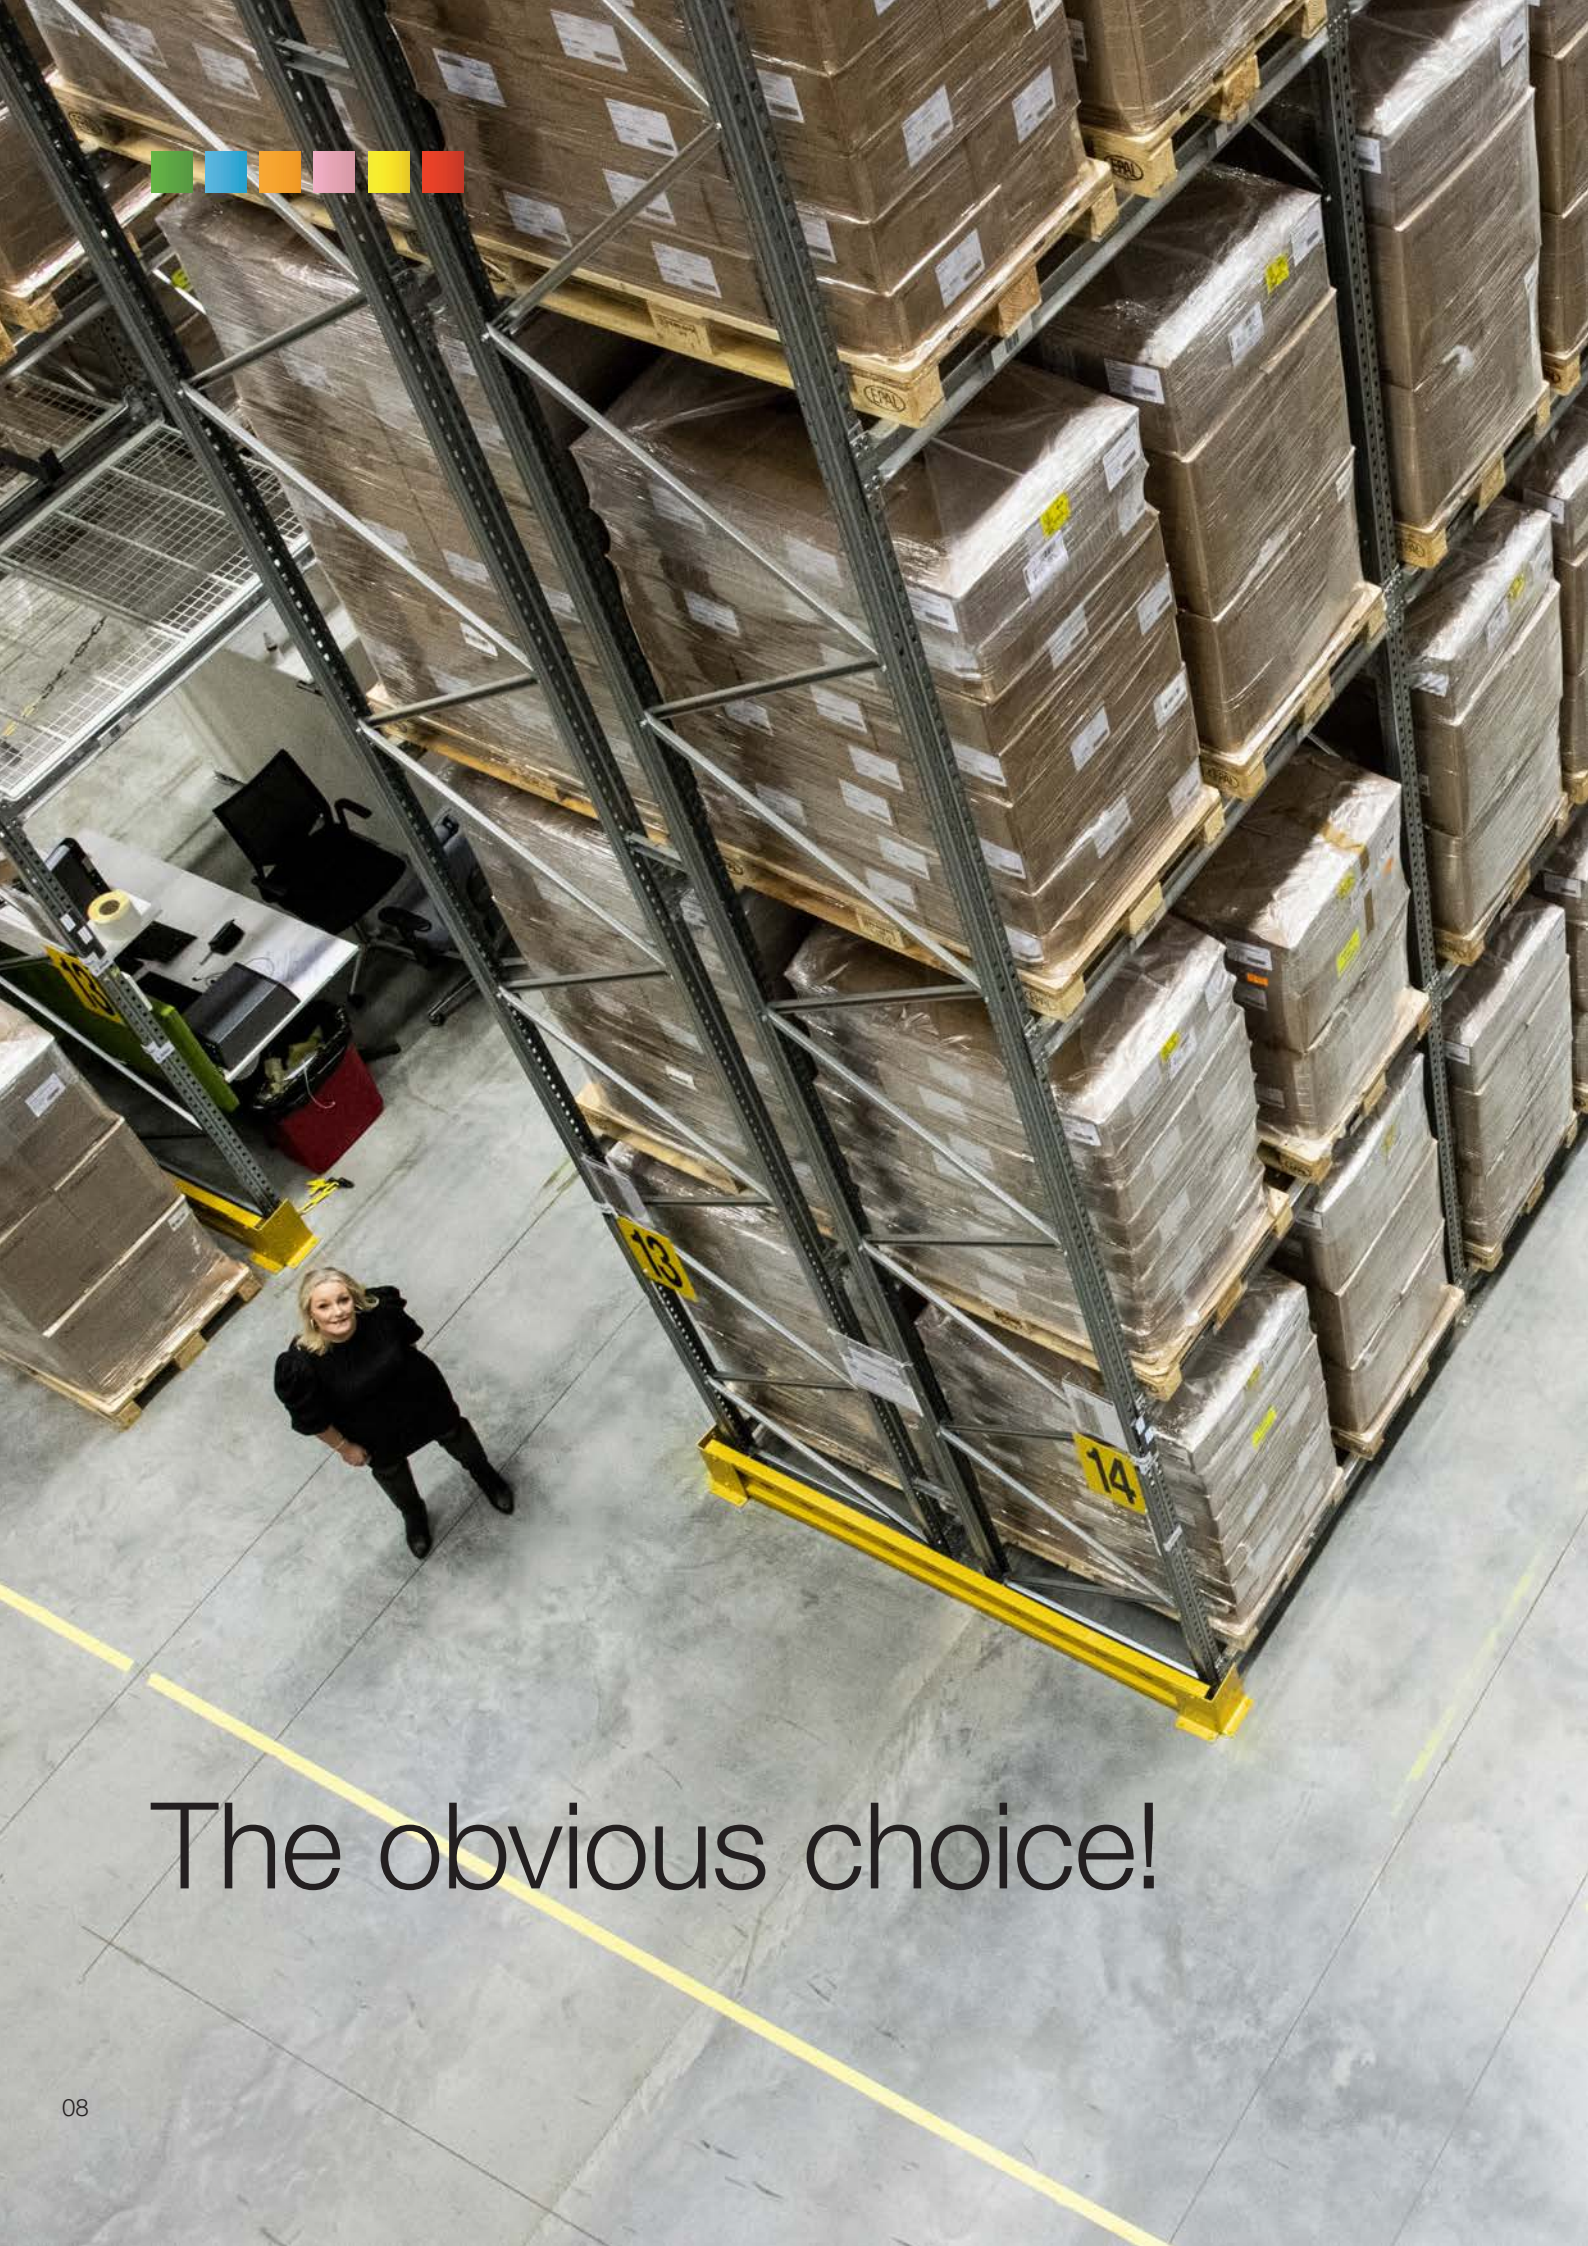

| | |
|------------------------------------|--|
| Temperature control | We adapt to our customers' needs and requirements |
| Humidity control | We adapt to our customers' needs and requirements |
| Pest control | Regularly and spread over the year |

**Quality, Environmental and Information
Security Management.**

Strömberg has been certified according to ISO 9001 and ISO 14001 since 1999. In 2019, Strömberg implemented ISO 27001, Information Security Management.

ISO

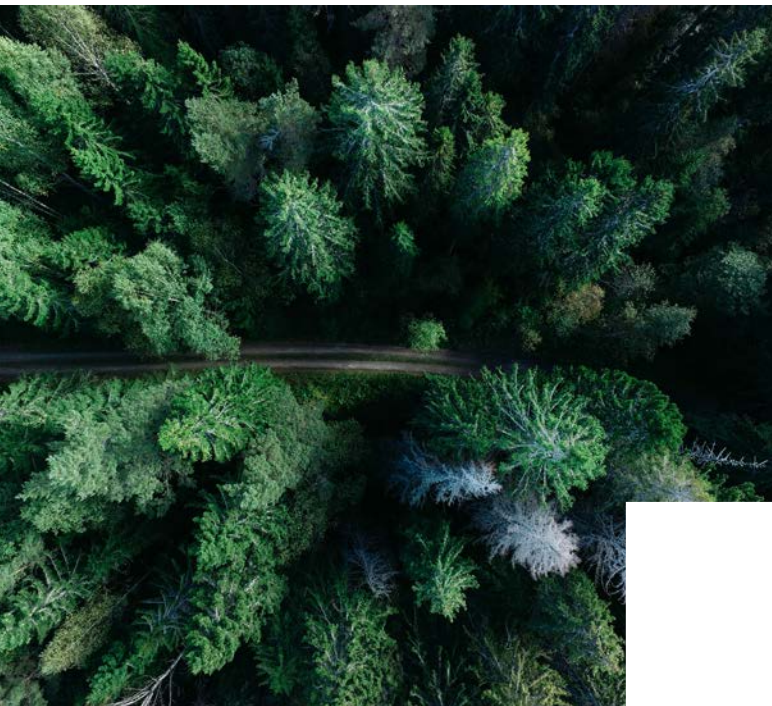

The obvious choice!

We take good care of your MedTech products

Sustainability – We care

At Strömberg, we invest heavily in environmental measures – clear actions that have an impact. That is why we have invested in our own wind power plant, providing us with all the energy needed for our entire business. 50% of the electricity generated is used by Strömberg, and the remaining 50% is sold to other environmentally conscious companies.

In addition, of course, at Strömberg we have an established sustainability plan which we are more than happy to share. We would like to see you and us working together, to set common goals for a sustainable future.

**Now fully self-sufficient
and independent for electricity**

Vestas turbine V110–2.0 MW

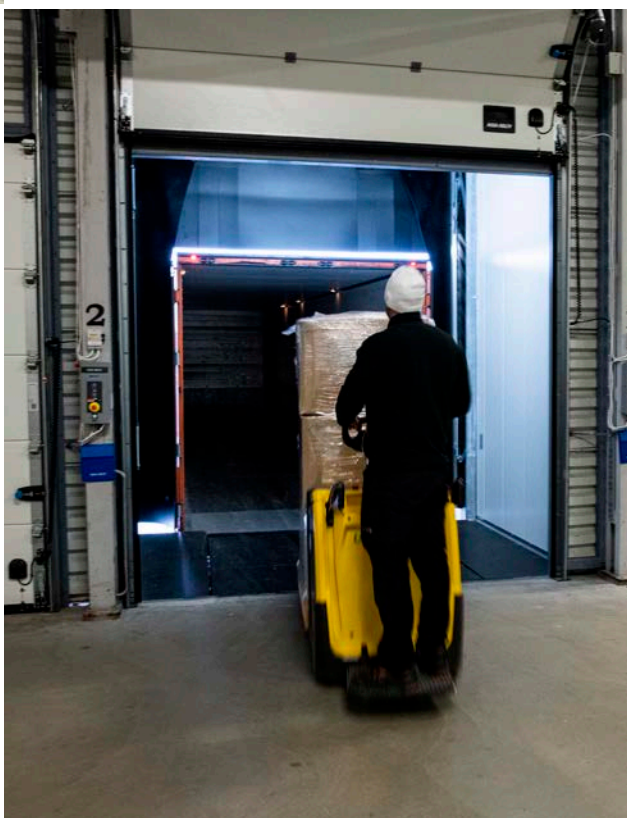

Current wind speed: 5.41 m/s

Diameter: 110 m

Output: 6 GWh/year

We have warehouses
in the Nordic countries

Our wish – An invitation to your next 3PL RFI & RFP

We know the industry, and we know that this kind of assignment is contract-driven and procured in accordance with controlling processes.

With the information presented here, our wish is that we, Strömberg, may be involved in your next 3PL procurement. We would be grateful if you could send your invitation to **medtech@strd.se**.

We are, of course, looking forward to a non-binding meeting, to have the opportunity to give you more detailed information about us.

Best regards,
All of us at Strömberg
