Metal Work Danmark A/S lancerer nu kvalitetsfittings for bremsesystemer på lastbiler og busser

- # Straight male terminal
- # Adjustable elbow stud
- # Pivoted studs with test point
- # Full range for all fittings.

Production and control.

Production is carried out with high technology machines operated by specialised technicians, giving top production capability supported by efficient, systematic quality control in accordance with UNI EN ISO 9001 standard and technical specification ISO TS 16949, with the help of electronic instrumentation.

SIRIT is dedicated to Air Brake Systems Fittings. The SIRIT fittings are studied to be used on Commercial Vehicles such as Trucks, Trailers, Buses, Tractors and build with high standards through a rigorous production process and a final test applied to 100% of the pieces produced.
