## QUICK START GUIDE

1

Turn on your Voicebird by pressing the big center button. To activate pairing, press and hold the top Bluetooth® button on the side of your Voicebird until the blue light flashes. The connection is active for 30 seconds.

2

Activate Bluetooth® on your mobile phone. Search for devices and connect to "Voicebird to phone". If asked for a passcode, enter "0000".

3

Plug a wired headset into the bottom of your Voicebird. You are now ready to record your first conversation. To record, simply press the big center button.

1

You can also use a Bluetooth® headset with your Voicebird. See how to in the user guide, or visit us at [www.voicebird.com](http://www.voicebird.com) for further information.

Only **43 dB**

NOISE LEVELS CAN BE HARD TO GRASP  
- LET'S PUT THINGS INTO PERSPECTIVE...

The Mars Silence cabinet is the quietest cabinet available today  
- in fact it's almost as quiet as a library! SHH...

#### THE SOUND OF SILENCE

The Mars Silence cabinet is engineered to ensure low noise and low vibration while taking full advantage of the latest energy-saving advances.

Precise digital control of the Mars Silence cabinet allows for direct setting of fan speeds, resulting in significantly lower operational costs and optimal performance.

- Increased efficiency with lower energy consumption
- Lower operating temperatures and increased operational life
- Precise digital control and monitoring of operating speeds
- Vibration-free on all work surfaces
