DESCRIPTION

Portable induction heater that allows for quick unlocking of bolts, nuts, gears, joints, and screws. It is particularly useful for applications in bodywork, auto repair shops, agriculture, maintenance, metalworking, etc. By adjusting the power, it transfers heat quickly to the part to be unlocked in a localized and precise manner. Equipped with a color LCD display for viewing the operation and set parameters. Liquid-cooled for continuous use over time.

Features:

- automatic and manual power adjustment;
- liquid lock button for tool change;
- compact and easily portable.

Supplied with an M12 induction tool with a 2m cable.
