

Gear Case

Transport and protect your equipment

Two variants of Gear Case

The Gear Case system is designed to protect your valuable equipment during storage, transport, and use in demanding conditions. Choose between two versions: a wheeled case with a retractable handle or a portable carry case with a fixed handle. Both models fit equipment such as the Rogue ES, Cutmaster, or Renegade, along with additional accessories stacked on top.

The heavy-duty, impact-resistant construction withstands drops, shocks, and rough handling. A weather-sealed design protects the contents from dust, moisture, and harsh conditions. Reinforced latches and handles deliver long-term durability in industrial environments. Large, rugged 22 cm (8 in.) all-terrain wheels make transporting heavy loads easy on any surface.

Main features:

- **Durable** - Built from heavy-duty, impact-resistant materials
- **Portable** - Choose between wheels with a retractable handle or a standard carry handle for convenience
- **Modular** - Stackable design for simple storage and transport
- **Flexible** - Open interior space accommodates equipment and accessories
- **Sealed** - Protects contents from dust and water
