

**X20**

# Why Machine Builders Choose These Controllers

Again and Again

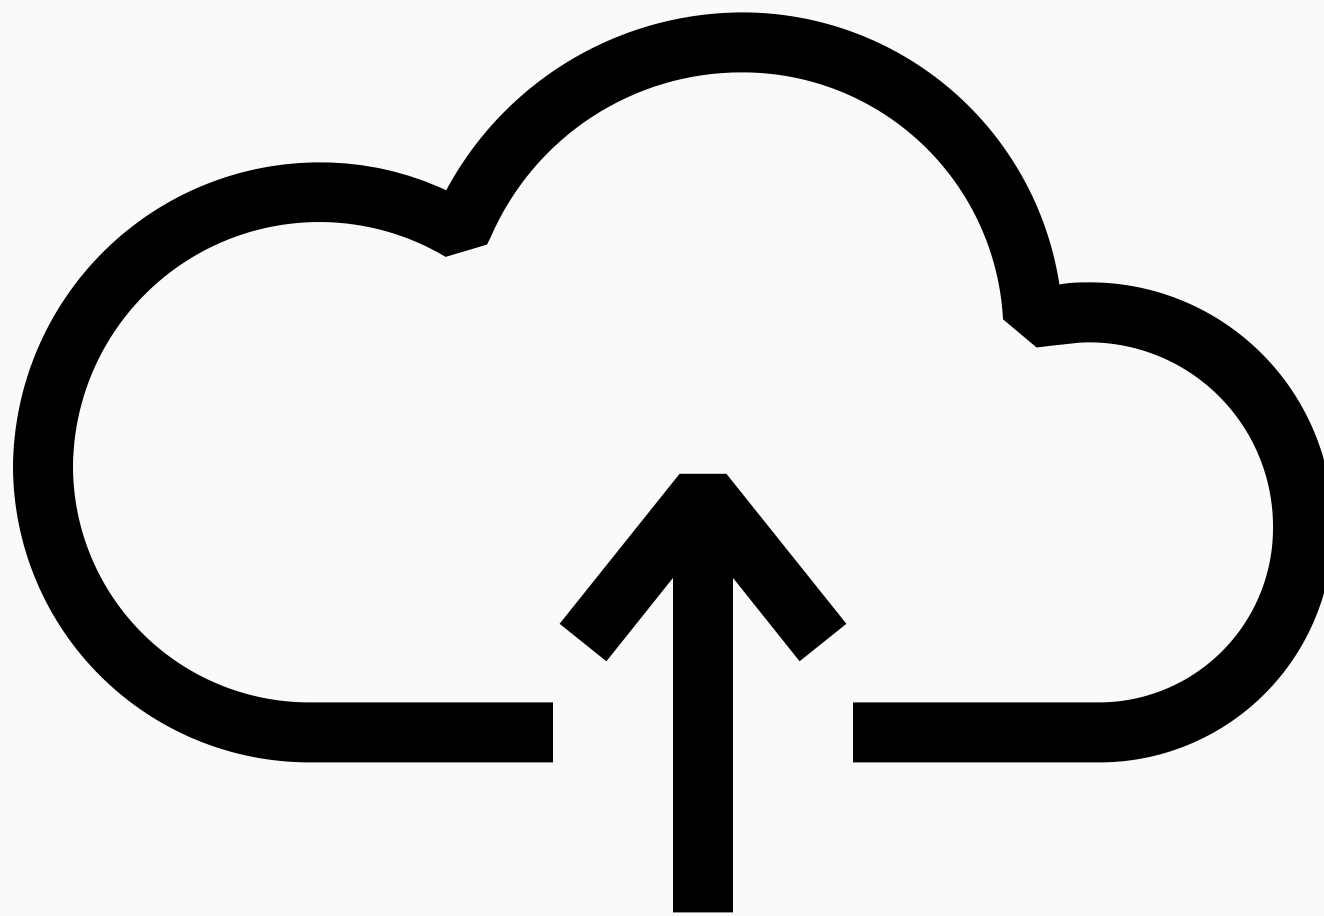

# **Automatic Hardware Detection**

No need to set node numbers manually.

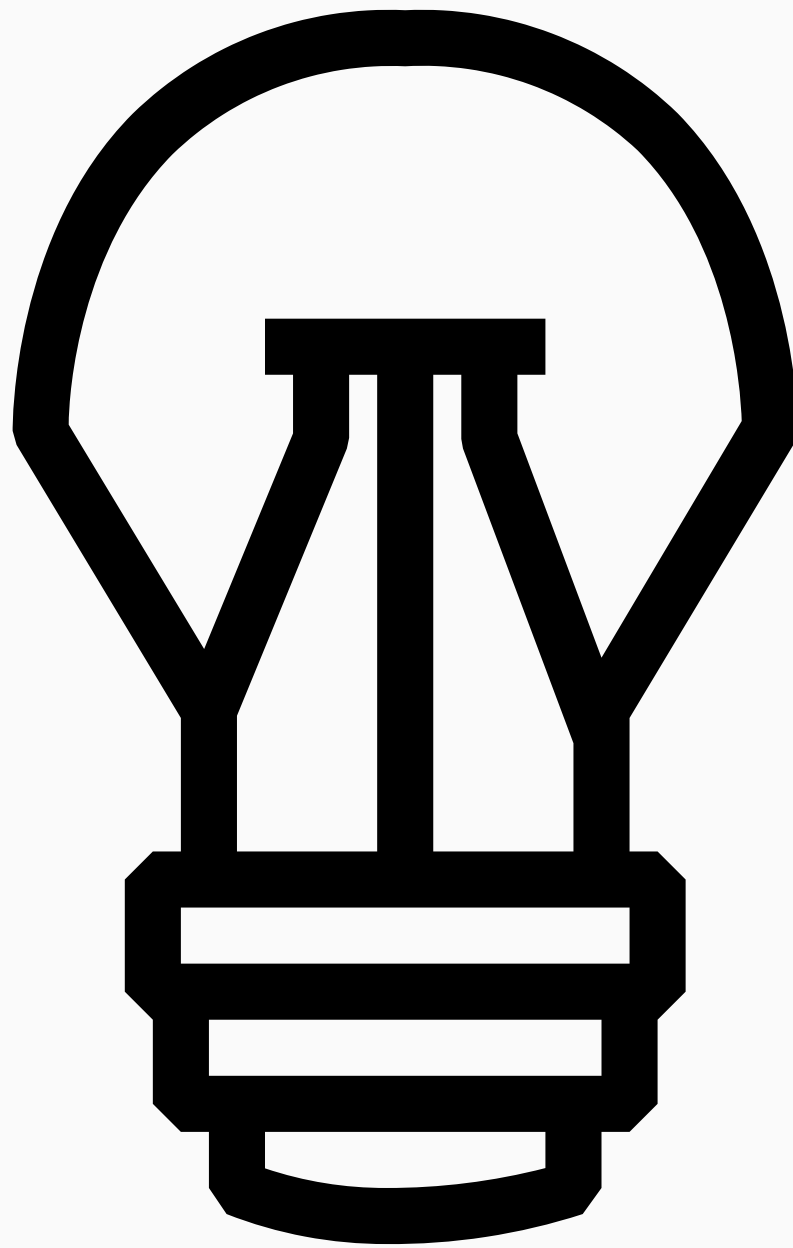

# Remote Installation

Use USB on-site or transfer files remotely.  
You decide.

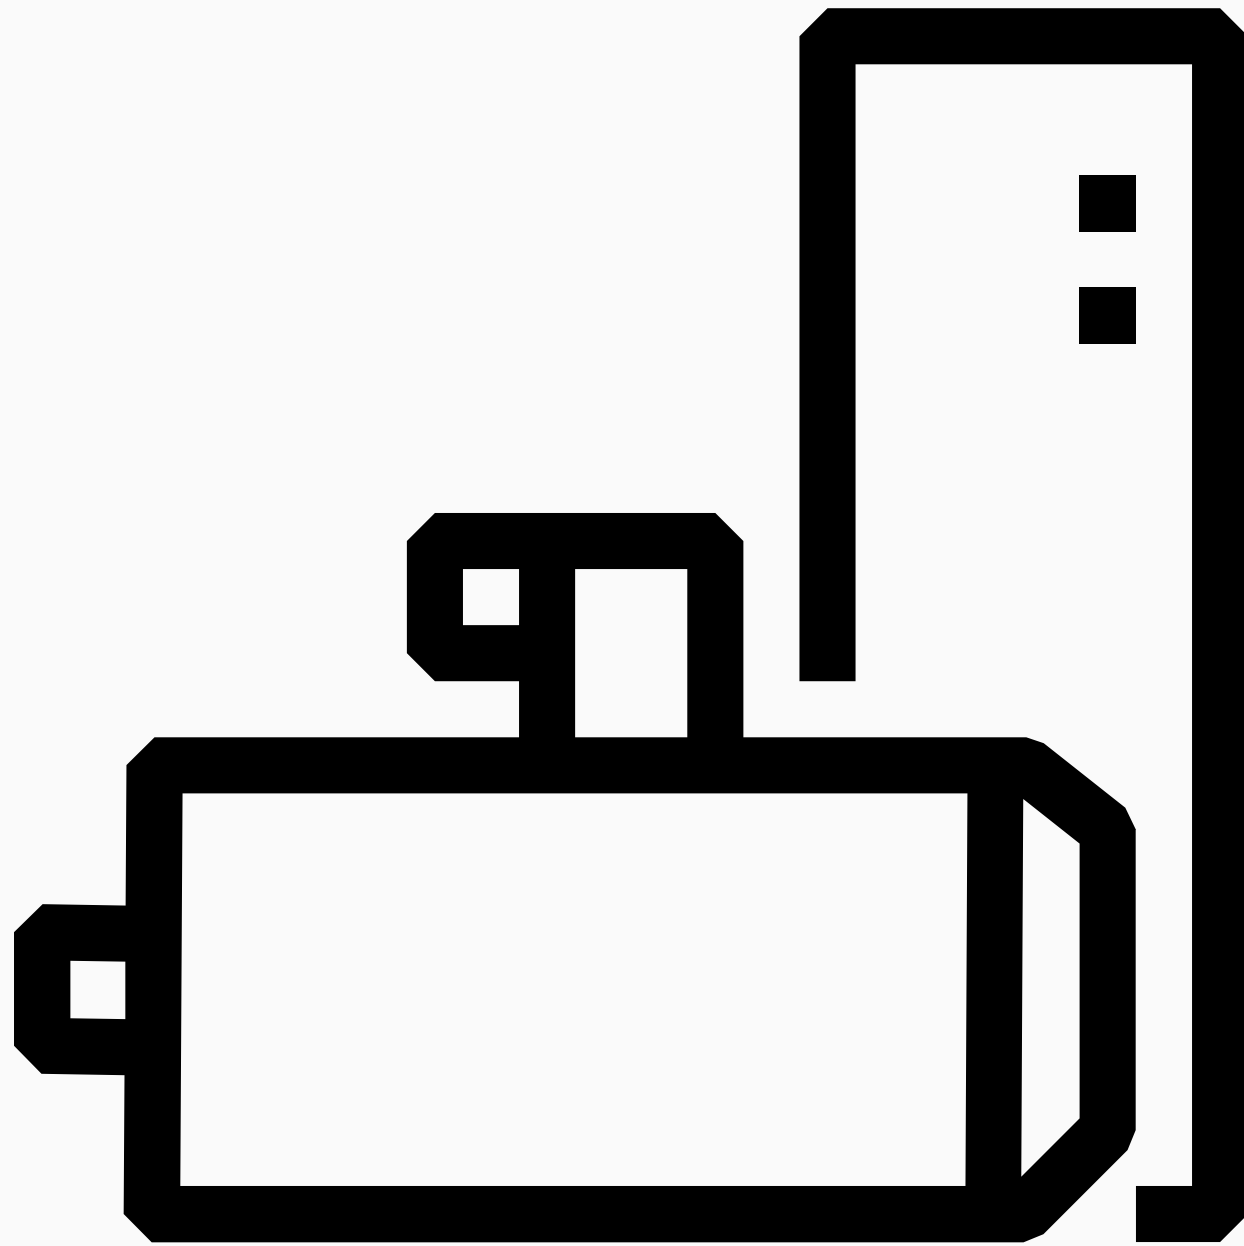

# **Diagnostics Made Simple**

Clear LED status indicators on every module.

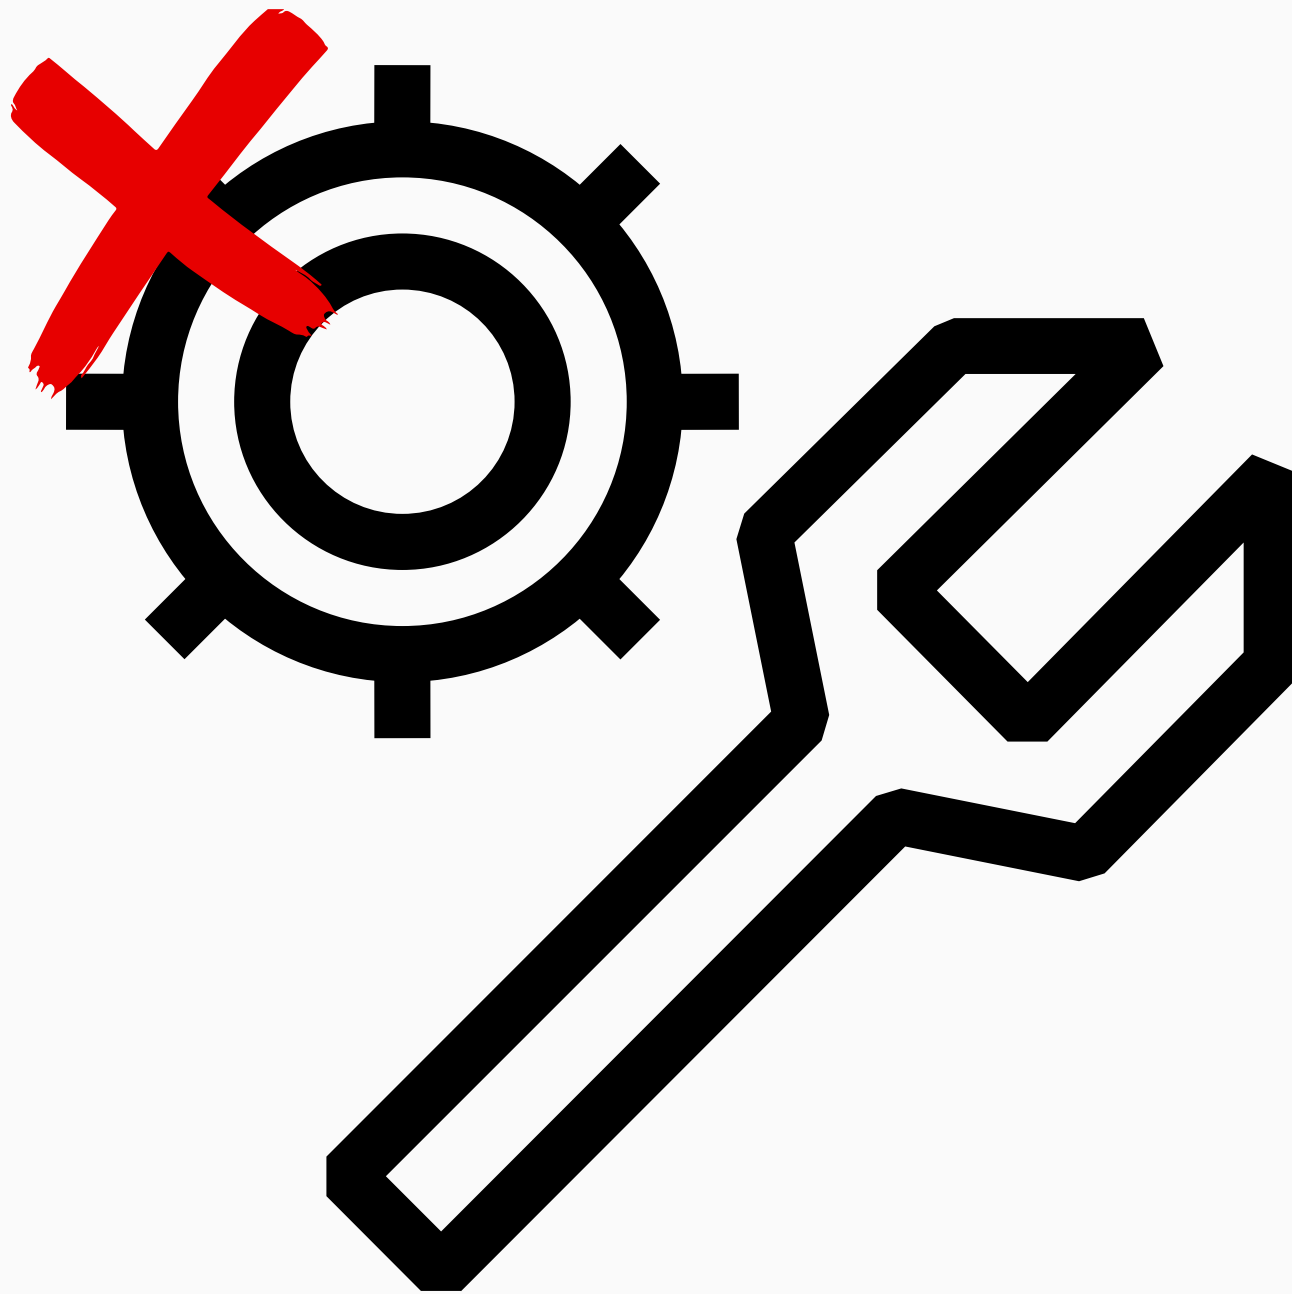

# Automatic Firmware Updates

As soon as a new module is detected,  
the correct firmware is installed.

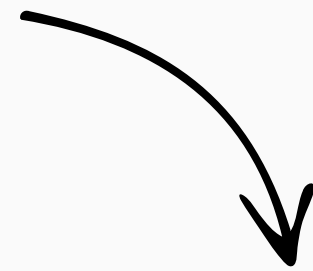

# **Modules are Plug-In With Spring Terminals**

Safe and tool-free wiring with no exposed leads.
