“Each of us must be of use to someone or something and must be aware that, through our behaviour, we can contribute to ensuring the future of the new generations”

GUIDO FORNARI
Founder of Ecol Studio S.p.A.

Trusting in the services of Ecol Studio is a **strategic choice**: the ability to create and activate **growth** and **development** processes in companies, reacting promptly and espousing a profoundly ethical conduct are the company's strongholds.

Ecol Studio has for years been successfully involved in the realms of **occupational health and safety**, the **environment** and **product quality** with distinctive competences as far as services and markets, specialising in:

Laboratory analyses • Consultancy • Training

The company has several offices located in Italy and two in Europe, which work in synergy sharing skills and increasing customer value.

Since 1982, Ecol Studio fosters **companies' growth** by actuating policies oriented towards **sustainable development, offering innovative**, customized services and prompt, high-added-value solutions.

The over 200 people working at Ecol Studio share a common passion for daily commitment to three foundational principles: **ethics, customer satisfaction** and **a quest for excellence**, because Ecol Studio works through the virtuous actions of its customers in order to make the world better and contribute to ensuring a sustainable future to the new generations.

AREAS OF COMPETENCE

HEALTH & SAFETY

Safer and cleaner work environments are also more productive.

Ecol Studio promotes a culture of prevention and supports companies in **preventing accidents and professional diseases, ensuring the complete physical, psychological and social wellness** of the workers and of the organization as a whole. Helping companies in the respect of laws and of norm obligations, averting **criminal, administrative and financial penalties**, implementing organizational and management models integrated with the production processes that support **business continuity**.

ENVIRONMENT

Environmental protection and efficient energy management are essential factors for success.

Ecol Studio assists companies so that they are able to guarantee the **respect of environmental standards and improve their green and energy performance**. Thanks to its in-depth experience in **handling environmental authorization documents**, Ecol Studio supports companies in these particular processes by **monitoring and respecting document delivery times and application schedules**, managing them directly and in their entirety thanks to an internal multi-disciplinary approach, **preventively interfacing with the entities & authorities involved**.

PRODUCT QUALITY

Brand growth passes through corporate quality standards.

Ecol Studio offers **innovative solutions and reliable tests** to manufacture **products and implement processes that conform to the increasingly complex standards** required and to the continually evolving norms in force. Supporting companies **in the attainment of the desired**, binding quality so that they are facilitated in answering the **demands of their sphere of business** and capable of **consolidating their brand** in relation to the stakeholders, bringing about **improvements in terms of time, costs and effectiveness**.

OUR SERVICES

LABORATORY ANALYSES

Chemical and microbiological analyses and **environmental** assessments (water, sludge, waste and land), control of the **emissions into the atmosphere** and of the **quality of the air**. Analyses of **industrial hygiene** and **chemical and microbiological** as well as **physical analyses** such as the **impact of noise, vibrations, lighting** and **electromagnetic fields** in work environments, **internal and external assessments** of industrial buildings. Analyses to verify **the suitability of food contact materials** (FCMs) of **materials** such as paper, plastic and others, **finished objects, machinery**.

Large spaces suitable for the tasks performed, leading edge instruments and qualified personnel. Quick & reliable results.

Laboratory accredited by Accredia certificate no. O130, no. O578 and no. 1110 in compliance with norm UNI CEI EN ISO/IEC 17025:2005.

TRAINING

Added-value training consultancy activities throughout the national territory in support of the growth of medium- and large-sized companies.

Management of **all administrative and bureaucratic documents**.

Accredited training agency in the regions of Tuscany and Piedmont.

Standard courses catalogue and **personalized proposals**; “in house”, intra-company or e-learning modes.

Updated training proposals suited to market demands, in-line with the norms and standards in force, on **themes** pertaining to **environmental protection** and **energy management, health and safety, product** and **process quality**.

CONSULTANCY

- Specialisation in specific fields.
- Continuous updating in the fields of competence.
- Trained specialists acknowledged in Italy and abroad.
- Knowledge of Italian and international norms.
- Command of the customer's reference market.

Specific consultancy and qualified analytical competence on safeguarding **health and safety**, on the respect of laws and norm obligations and in the implementation of management systems. Appointment of prevention and protection assistance services manager, machine/equipment safety, fire prevention, risk assessment, implementation of OHSAS 18001 management systems and 231 Organizational Models, authorization documents for: start/modification of activity and commissioning of equipment/plants. Personalized continuous assistance contracts in compliance management in the realm of workplace health and safety.

Effective and operational consultancy on issues pertaining to the **environment** and to **energy** with customized contract schemes based on specific needs. We offer collaboration for the design, assessment and authorization activities and help companies prepare their documents in the environmental field pursuant to norms in force (authorizations required in Italy: VIA; AIA; AUA, AUE, documents for waste plant management, etc.). Energy diagnoses, consultancy for “white certificates”/GSE national grid operator, emission trading and specific consultancy on issues pertaining to waste, contaminated sites, characterization and other, similar themes and issues. We implement, maintain or adapt environmental and energy management systems.

Design and development of product **quality** management systems in conformity to standards and assistance during certification audits. We help companies obtaining product safety certifications (BRC, IFS FOOD and HPC certifications, implementation of a GMP system, Reg. EC 2023/2006) and environmental product certifications (PEFC, FSC, European Ecolabel, Nordic Ecolabelling and Blue Angel).
