

Danmarks første kommercielle serviceudbyder af 3D print skifter navn

For English, see below.

Fra torsdag den 1. maj bliver Prototal Damvig A/S til Prototal Denmark A/S. Med navneskiftet fuldendes brandmigrationen efter Prototal Industries AB opkøb af Damvig A/S tilbage i 2019.

"Prototal Denmark er Prototal Industries nye lokale identitet i Danmark. Medarbejderne forbliver de samme, og vores kernefokus er stadig innovation, kvalitet og tillid! Sammenlægningen af Damvig med Prototal Industries har været en fantastisk rejse, og vores kunder kommer bl.a. til at opleve flere og bedre serviceløsninger indenfor fremstilling i sprøjttestøb og industriel 3D print, samt en stærkere digital platform" – Susanne Damvig, Adm. direktør

30 år med innovation og fremstilling

Navneskiftet er ikke blot en ny identitet, det er også et farvel til et 30-årig gammelt og stolt dansk brand. Damvig Develop så dagens lys i maj 1995, da søskendeparret Susanne og Jesper Damvig oprettede Danmarks første kommercielle serviceudbyder af 3D print.

Sidenhen og igennem de sidste 30 år har Damvig cementeret sig som en go-to-partner for danske virksomheder, myndigheder og det fantastiske iværksættermiljø, dels på grund af vores enorme erfaring, dels fordi vi formår at investere i den nyeste teknologi, men også fordi vi med vores passion har formået at uddanne Danmarks industri i 3D print-teknologien fra begyndelsen.

Kort sagt – **3D PRINT WE KNOW-HOW**, og det gør vi stadig!

"Jeg husker stadig de enorme mængder af floppydiske vi modtog fra vores kunder, der tilsammen udgjorde én 3D-fil, i midt 90'erne. Siden da har teknologierne rykket sig på utallige parametre, så man i dag kan serieproducere større mængder uden at gå på kompromis med fx kvalitet, designfrihed og time-to-market. Og som en del af en stor europæisk concern, har vi aldrig været tættere på udviklingen af teknologierne, som vi er nu" – Jesper Damvig, Teknisk direktør

Om Prototal Industries AB

Prototal Industries er Europas største leverandør af sprøjttestøbning, værktøjsfremstilling, vakuumstøbning samt industriel 3D print i både polymer og metal. Prototal Industries stræber efter at være den mest fleksible og kompetente partner for serieproduktion inden for fremstillingsindustrien.

Prototal Industries mangfoldige og topmoderne faciliteter kombineret med et erfarent team gør os i stand til at levere produkter og services af høj kvalitet. Med faciliteter i Østrig, Danmark, England, Frankrig, Italien, Norge, Skotland og Sverige er Prototal gruppen lokalt forankret, med mulighed for kunderne at drage fordel af et digitalt distribueret produktionsnetværk.

Denmark's first commercial 3D printing service provider changes its name

From Thursday, May 1st, Prototal Damvig A/S will become Prototal Denmark A/S. The name change completes the brand migration following Prototal Industries AB's acquisition of Damvig A/S back in 2019.

"Prototal Denmark is Prototal Industries' new local identity in Denmark. The employees remain the same, and our core focus is still innovation, quality, and trust! The merger of Damvig with Prototal Industries has been a fantastic journey, and our customers will, among other things, experience more and better service solutions within injection molding and industrial 3D printing, as well as a stronger digital platform" – Susanne Damvig, CEO.

30 years of innovation and manufacturing

The name change is not just a new identity; it is also a farewell to a 30-year-old and proud Danish brand. Damvig Develop saw the light of day in May 1995, when siblings Susanne and Jesper Damvig established Denmark's first commercial 3D printing service provider.

Since then and over the past 30 years, Damvig has cemented its position as a go-to partner for Danish companies, authorities, and the fantastic entrepreneurial environment, partly due to our vast experience, partly because we manage to invest in the latest technology, but also because, with our passion, we have managed to educate Denmark's industry in 3D printing technology from the beginning.

In short – **3D PRINT WE KNOW-HOW**, and we still do!

"I still remember the enormous amounts of floppy disks we received from our customers, which together constituted one 3D file, in the mid-90s. Since then, technologies have advanced on countless parameters, so today it is possible to mass-produce larger quantities without compromising on, for example, quality, design freedom and time-to-market. And as part of a large European group, we have never been closer to the development of the technologies as we are now" – Jesper Damvig, Technical Director.

About Prototal Industries AB

Prototal Industries is Europe's largest supplier of injection molding, tool manufacturing, vacuum casting, and industrial 3D printing in both polymer and metal. Prototal Industries strives to be the most flexible and competent partner for serial production within the manufacturing industry.

Prototal Industries' diverse and state-of-the-art facilities, combined with an experienced team, enable us to deliver high-quality products and services. With facilities in Austria, Denmark, England, France, Italy, Norway, Scotland, and Sweden, the Prototal Group is locally anchored, offering customers the opportunity to benefit from a digitally distributed production network.
