

GREENLINE

Efficient pallet handling - "no more pallets taken by hand..."

AUTOMATIC STACKING AND DESTACKING

The user inserts or removes the pallets using a stacking truck or fork lift truck. All handling is carried out at floor level. The PALOMAT Greenline detects the pallets via photo sensors after which they are automatically stacked or destacked one by one.

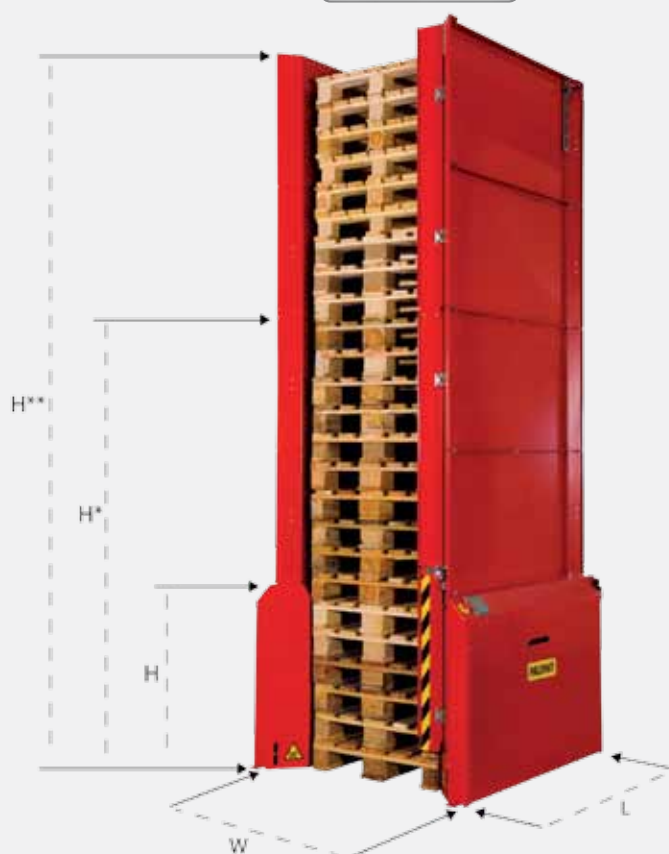

When selecting destacking, a stack of no more than 15 to 25 pallets will be inserted in the PALOMAT, after which the pallets are automatically destacked one by one. When selecting stacking, the pallets are inserted one by one, after which the pallets are automatically stacked to no

more than 15 to 25 pallets. The entire stack can subsequently be removed.

PALOMAT Greenline is only operated manually using the touch panel when there is to be a change between stacking and destacking or vice versa. In addition to this, the PALOMAT Greenline operates automatically.

The PALOMAT is a standard pallet magazine but has a lot of possibilities when it comes to types of pallets and sizes. Customer-specific solutions can be offered on request.

Product news
Greenline
for 25 pallets

YOUR ADVANTAGES...

- Order
- Optimized pallet flow
- Improved working environment
- Cost savings on pallets
- Increased efficiency
- No manual pallet handling
- Fewer destroyed pallets
- Reduced absence due to illness
- Reduced time used per pallet
- Prevention of back injuries, pinched fingers and feet.
- Reduced use of trucks
- "Plug and Play" solution

MODELS				
Product No.	Model dimensions L x W x H (mm)	Pallet size L x W x H (mm)	Lifting capacity	Number of pallets
152001	1520x1340x955/ 2350*	1200x800x150	500 kg	15 pallets
152002	1520x1540x955/ 2350*	1200x1000x150	500 kg	15 pallets
152101	1520x1340x3750**	1200x800x150	700 kg	25 pallets
152102	1520x1540x3750**	1200x1000x150	700 kg	25 pallets
