CleanAirTower

Art. No.: 390 620

Applications

- Workshops where local exhaust ventilation is not possible
- · To complement local exhaust ventilation systems
- Environments with changing sources of smoke and dust
- Workstations, Workshops, Logistic and distribution centres

Benefits

- Effective energy reduction of possible sparks and particles by the pinball method with 7 or more collision points
- · Effective efficiency through tornado principle
- Minimization of heating costs due to air recirculation and air distribution
- Enormously long filter lifetime due to optimised air flow
- Increased safety with contamination-free dust disposal
- · Low risk potential due to foreign bodies
- Cost-effective installation or retrofit, as no ductwork is needed
- New head element can be retrofitted to existing systems
- Safe transportation and easy installation by crane eyes
- Permanent operation by means of automatic dust disposal in dust collection bin

Properties

- · Automatic filter cleaning
- · Lifting eyes
- · Effective baffle plates for spark pre-separation
- · KEMPER-Cloud connection via mobile network*
- Contamination -free dust disposal in one-way containers.
- · Optimised airflow
- · Pinball method and tornado principle
- Displacement flow principle, recommended by health and safety bodies
- · System barely generates air turbulence

Accessories

AirWatch
