

KF Series

HYUNDAI WIA Vertical Machining Center

KF SERIES

The Fastest, the Most Versatile High end Linear Machining Center

The Vertical Machining Center KF Series, designed by Hyundai WIA with years of expertise and the latest technology, maximizes productivity while maintaining rigidity and accuracy.

01
KF Series

KF4600

High Speed & Productivity

900/460/520 mm
Travel (X/Y/Z)

35.4/18.1/20.5 inch
Travel (X/Y/Z)

36/36/36 m/min
Rapid Traverse Rate (X/Y/Z)

1,417/1,417/1,417 ipm
Rapid Traverse Rate (X/Y/Z)

Basic Features

01 Direct Driven Spindle

By connecting the motor directly to the spindle, acc/dec. time has shortened. A wide range of machining can be done with spindle speed of up to 12,000rpm.

Built-in Spindle

The 15,000rpm built-in spindle can minimize vibration transmitted to the spindle. It allows excellent machining performance in mold and high-precision products.

Direct Driven Spindle

8,000/10,000/12,000 rpm

Built-in Spindle

15,000 rpm

※ Thermal Displacement Compensation
as Standard

02 Table

Compared to competitive machines, the KF4600 has a large working capacity to make setup easier and provide convenience to the operator.

03 ATC & Magazine

The tool magazine holds 30 tools as standard and 40 tools as an option. Due to the wider selection of tools and the random tool selection method, tool change time has improved.

- Tool Change Time (C-C) : **3.2 sec**

04 Optimal Structural Analysis

KF4600 is designed to have optimal structure through Hyundai WIA's unique structural analysis. In particular, enhancement of bed and column's rigidity makes excellent performance even in heavy duty cutting.

● KF4600 Rigidity

X Axis : Compared to the previous model **186% UP**

Y Axis : Compared to the previous model **158% UP**

Z Axis : Compared to the previous model **179% UP**

KF4600 Slideway

High-Precision & Speed Vertical Machining Center

One Piece High Column Structure (8K, 12K)

One piece high column is provided as an option up to z-axis height of 200 mm (7.9").

This option helps to process bigger products such as rack housing.

KF4600 (A~B)

150~670 mm

Increase of Saddle Rigidity

The KF6700 with the largest saddle among the KF series has almost same level of saddle-end displacement as the base model. This improvement leads to the high quality machining.

Double anchored ball screw

The pretensioned ball screw minimizes the expansion and contraction according to the heat and further reinforces the rigidity by the double anchor support method.

In addition, the coupling of the ballscrews and the highly reliable digital servo motors are connected by **metal plate couplings**, to reduce coupling breakage and backlash.

High-Speed Roller LM Guideway

Linear roller guideways are applied to reduce non-cutting time and bring high rigidity. Each axis is directly connected to a highly reliable digital servo motor to provide high rigidity and minimal thermal displacement.

Rigidity has increased 168% compared to the Ball Bearing LM Guide

n4
KF Series

Direct Driven Spindle

Long Lasting High Accuracy & Excellent Performance

Spindle

High-Performance, Direct Driven Spindle

The directly coupled spindle at a maximum revolution of 12,000rpm, allows high-speed processing. Additionally, the large diameter and the thickness of the spindle add to the stability of the machine.

To meet various user's demand, HSK type spindle is also available. (HSK-A63 : 12K)

Dual Contact Spindle

The Big Plus spindle system (BBT40) provides dual contact between the spindle face and the flange face of the tool holder. This greatly increases tool rigidity, reduces run out and adds significant productivity to machining applications.

- Tool Lock Type : **Hydraulics**

Through Spindle Coolant **OPTION**

Through Spindle Coolant is exceedingly useful when drilling deep holes. It helps increase the lifetime of the tool, while decreasing cycle time.

20 bar / 30 bar / 70 bar
(290 psi / 435 psi / 1,015 psi)

Spindle Cooling (12K Std.)

The spindle cooling system minimizes thermal displacement which can happen during lengthy machining operations, and offers continued accuracy based on the thermal stability.

n5
KF Series

Built-in Spindle

Long Lasting High Accuracy & Excellent Performance

High-Precision

20,000rpm Built-in Spindle

By using ultra precision angular ball bearings, fast acceleration and deceleration of the main spindle is achieved.

The spindle head is designed to minimize the heat displacement of main spindle, and with the use of hydraulic tool lock system, the machining stability has increased.

Dual Contact Spindle

The Big Plus spindle system (BBT40) provides dual contact between the spindle face and the flange face of the tool holder. This greatly increases tool rigidity, reduces run out and adds significant productivity to machining applications.

- Tool Lock Type : **Hydraulics**

Through Spindle Coolant **OPTION**

Through Spindle Coolant is exceedingly useful when drilling deep holes. It helps increase the lifetime of the tool, while decreasing cycle time.

20 bar / 30 bar / 70 bar
(290 psi / 435 psi / 1,015 psi)

HSK Tool Holder **OPTION**

HSK tool holder is utilized for precise positioning with less expansion in the spindle taper during high speed rotation. This ensures an excellent level of precision for die mold machining.

Spindle Cooling

The spindle cooling system minimizes thermal displacement which can happen during lengthy machining operations, and offers continued accuracy based on the thermal stability.

KF Series

Table

High Productivity Achieved with High Rigidity,
Accuracy Machining

Increase of Table Rigidity

The rigidity of the table has increased by fastening the table and LM guide with 6 bolts.
(Previous model, Competitive models: 4 bolts)

Rigidity of KF6700 Table has Increased by Structural Analysis.

The thickness of the table has been increased by 9mm(0.4") compared to the base equipment by reinforcing the rib structure of the KF6700 table. This makes it possible to process the product under severe cutting and high load.

KF Series Table

Model	KF4600	KF5600	KF6700
Table Size	1,050×460 mm (41.3"x18.1")	1,250×560 mm (49.2"x22")	1,500×670 mm (59"x26.4")
Max. Load Capacity	600 kg (1,323 lb)	1,000 kg (2,205 lb)	1,300 kg (2,866 lb)

07
KF Series

ATC & Magazine

High Productivity Achieved with High Rigidity,
Accuracy Machining

High Speed ATC

Position control through twin arm ATC on servo motors has been improved drastically. In addition, tool exchanging has become easier, reducing specific cutting time tremendously.

ATC Speed Improvement

Tool to Tool Time

Previous Machine	2.6 sec
KF Series	1.4 sec

Chip to Chip Time

Previous Machine	6.6 sec
KF Series	3.2 sec

❖ KF6700 (Built-in : 3.3 sec)

Servo ATC

Position control on the Twin Arm ATC using Servo Motors has improved drastically. The twin arm ATC enables faster tool change and increased productivity.

Magazine

The tool magazine holds 30 tools as standard and 40 tools as an option. Due to the wider selection of tools and the random tool selection method, tool change time has improved.

- 40 Tool Magazine : Servo Motor
- 30 Tool Magazine : Geared Motor (Opt. Servo Motor)

- No. of Tools : 30 [40] EA
- Tool Selection Method : Random

- Tool Shank : BBT40 [HSK-A63 : 12K, 15K, 20K]
- Max. Tool Weight : 8 kg (18 lb)
- Max. Tool Dia. (W.T / W.O) : Ø80[Ø76]/Ø125 (Ø3.1"[Ø3"]/Ø4.9")
- Max. Tool Length : 300 mm (11.8")

Smart System

Software for Smart Operating and Machining

Faster processing and enhanced accuracy in are possible through the **HYUNDAI WIA Smart System**. The user friendly software and equipment monitoring of the Smart System maximizes productivity.

Interface Port

Convenience is increased when inputting and outputting program. Because it is now capable of using USB port in addition to current way like CF memory card or LAN

Energy Saving Function(ECO) & SMART Machining

You can use energy saving function (ECO) and machining optimization function (SMART) with MCP button.

Mold-related Software (Standard when selecting 20K Built-in Spindle)

HW-AFC

HYUNDAI WIA
Adaptive Feed Control

OPTION

HW-MCS

HYUNDAI WIA
Machining Condition Selection

OPTION

Software that controls the feed automatically to maintain a certain working load to extend tool life as well as productivity.

Software that automatically sets cutting and feeding parameters according to the machining types (speed, degree, quality)

Smart Factory HW-MMS (HYUNDAI WIA-Machine Monitoring System) **OPTION**

A brand new manufacturing machine by HYUNDAI WIA, HW-MMS is a unique software capable of monitoring the operation status of manufacturing machines in factories, a smart solution to improve manufacturing conditions of customers.

- 01 Real-time monitoring of machine operation status (Cloud)
- 02 History and statistics of machine operation (Cloud)
- 03 History and statistics of alarm occurrence (Cloud)
- 04 History and statistics of work count (Cloud)
- 05 Remote diagnosis (Remote)

HW-MCG
HYUNDAI WIA
Machine Guidance

Software that offers operation, maintenance, management monitoring and various user friendly features.

HW-TDC **OPTION**
HYUNDAI WIA Thermal
Displacement Compensation

Software that measures the changes in the external environment as well as heat emission during processing to help reduce thermal displacement.

HW-WARMUP
HYUNDAI WIA
WARMing Up

Warm-up software that measures main spindle halt and offers system warm-up time automatically.

HW-ESS
HYUNDAI WIA
Energy Saving System

An environmental friendly software that reduces the unnecessarily wasted standby power waiting for an operation.

HW-TOM **OPTION**
HYUNDAI WIA
Tool Offset Measurement

User friendly GUI software that indicates tool length, diameter, and damage (H/W excluded)

HW-TM **OPTION**
HYUNDAI WIA
Tool Monitoring

A tool monitoring software which analyzes the load of the spindle motor to determine and monitor possible damage of tools.

09
KF Series

HYUNDAI-iTROL

The Powerful CNC platform for Machine Tools

HYUNDAI - iTROL

HYUNDAI Intelligent Control

Convenient and Easy-to-Use Machine Tool...

Hyundai WIA take operator convenience to a higher level with the new controller, HYUNDAI-iTROL.

Experience the new operating environment with HYUNDAI-iTROL.

Machining Process Monitoring

- Machine coordinate, work coordinate, relative coordinate and remaining distance displayed in one screen
- Intuitive view of spindle load, RPM meter, and machining progress
- More intuitive screen displaying work counter divided into 8 segments
- Easier identification of activated work coordinate and tool names
- A shortcut key added to PPU buttons

Measuring System

- Simplified UI by removing unnecessary screens
- Compatible with the standard Renishaw/Marposs as well as third-party TLM (the measuring program needs to be converted into TLM.SPF)
- Continuous measuring function to measure 10 tools at a time
- Tool data comparison (before and after measuring) and enhanced animation function

Coordinate System Setting

- Quicker setting of coordinate system enabled by an improved UI (using the top-left coordinate system value)
- Parameter change process has been changed to "enter all and apply later" type to prevent the worker's erroneous entry
- Pre-defined coordinate value displayed in the bottom bed image for easier identification
- A 'Spindle rotation' button added for easier spindle rotation

ACCU CENTER Setup

- The ACCU CENTER measuring screen that is most frequently used for work setup
- Upon selecting a position for the reference point, a guide with an image shows up, enabling you to easily set the coordinate system using the guide.

Tool Monitoring, AFC

- The same tool monitoring function as the Fanuc HW-TM + new AFC
- Automatic transfer speed control
 - Expected benefits : Tool monitoring possible even when machining molds and prototype products, etc. Shortens the cycle time and protects the machine through an active control function
 - Provides functions similar to the specialized company's product (Omatic)

Spindle Monitoring

- Real-time graph display of the spindle load value and monitoring load value
- Intuitive setting of target load value using a graph view of load during machining
- Graph zoom using the 'Full Screen View' and 'View Details' buttons on the right
- The smart control (AFC) function has been migrated/integrated into the tool monitoring function

Warming-up

- The mode selection path simplified with an improved UI
- Except Tool, Spindle RPM, Time, Program, the parameters not used frequently have been moved to 'Settings' screen.
- Messages for the current progress (%) and remaining time displayed at the top of the screen

HYUNDAI-iTROL Technology

COMMUNICATION FUNCTION

RJ 45 Ethernet

USB 2.0

Compact Flash Card

Easy input/output of program is possible with the use of USB memory card, CF memory card and LAN.

Energy Saving & ECO System

You can use energy saving function (ECO) and machining optimization function (SMART) with the MCP button.

10

KF Series

HEIDENHAIN

TNC Contouring Control with Drive System

HEIDENHAIN

The TNC 620 is compact and easy to read.

The TNC 640 is a versatile contouring control system that can control a 19-inch screen and up to 18 axes. Its flexible workshop-friendly programming functions, Heidenhain interactive programming and offline programming, allow the user to create the optimal machining environment.

HW-MCG (Machine Guidance)

PC S/W for various user conveniences such as machine control, maintenance, monitoring and etc.

KF Series

Mold Package (20K Built-in)

Powerful Mold Package, HYUNDAI-WIA Mold All in One

HWM ALL-IN-ONE

To enhance mold machining, the "HWM ALL-IN-ONE" is provided as a standard feature for KF Series.

This ensures accurate and high quality surface finishing and contouring.

Mold Package Option (20K Built-in)

HWM ALL IN ONE		1 Package (Standard)	2 Package (Option 1)	3 Package (Option 2)	4 Package (Option 3)
AICC II Package	200 block	●	●		
	600 block			●	
	1,000 block				●
S/W : HW-MCS, HW-AFC		●	●	●	●
Auto Power Off		●	●	●	●
Spindle Heat Distortion Compensation Device		●	●	●	●
Cutting Air Blow		●	●	●	●
Auto Tool Measuring Device		●	●	●	●

CONTROLLER

- **High Speed Contouring Control (AICC II)**
Recognizes NC Data prior to the current processing phase
- **Development S/W**
HW-MCS (Selectable Process Conditions)
HW-AFC (Adaptive Feed Control)
- **Automatic Power Off Device**

- **Main Spindle Cooling Device (8-channel)**
Maintains temperature on the main spindle from thermal displacement. (heat sensor)

- **Cutting Air Blow**
Cutting air blow is provided for mold machining.

- **Auto Tool Measuring Device (RENISHAW TS27R or LTS)**
Detects and sets tool length, and attrition (Graphic User Interface included)

Thermal Displacement Compensation Device

Thermal displacement of the spindle is minimized by the use of cooling techniques. This provides high accuracy when machining at high speed.

Interface

- Cooling system (Opt, control of setting temperature)
- Lubrication system (Oil-Air)

T.D.C With PT100 Sensor

T.D.C With DISP. Sensor

User Convenience

Various Devices for User Friendly

Chip Disposal Process

Chip Conveyor
Rear (Left)

Chip Conveyor
Front (Left)

Chip Conveyor
Front (Right)

Interior Screw Chip Conveyor (KF4600 OPTION)

Dual screw type chip conveyors are located at each side of the bed which makes it convenient to remove chips.

The interior screw and the chip conveyor operate at the same time and can be controlled separately at the time of prior consultation.

Coolant Unit & Chip Conveyor

Timely and effective disposal of chips will enhance productivity as well as the working environment.

Chip Conveyor	Chip Type	Coolant Tank Type	Chip Exhaust Direction
Hinge	Chip Type : Roughing Chip, Long Chip, Chip complex Material : SS41, 45C, Cast Steel	Flood Type	Left, Right, Rear
	Chip Type : Micro Chip Material : AL	Upper Type	Left, Right
Scraper	Chip Type : Finely broken chip blown out Material : cast Iron, Nonferrous	Flood Type	Left, Right, Rear
❖ Screw	Chip Type : The lower portion of micro-chips Material : Steel, Casting	-	Left, Right
❖ Drum Filter	Chip Type : Powder, Micro Chip Material : AL	-	Left, Right, Rear

❖ When ordering a screw or drum filter chip conveyor, prior consult with hyundai wia's sales person.

Flood Type

Upper Type

① Linear Scale **OPTION**

Linear scales can be applied when highly accurate positioning is required.

② NC Rotary Table **OPTION**

Additional axis machining is possible with the installation of NCRT.

③ U-Center **OPTION**

The U-Center makes external and internal diameter turning possible, allowing for a wide range of variety in products.

④ Hydraulic Supply Unit **OPTION**

Instead of the standard hydraulic supply unit, an optional fixture unit can bring the pressure up to 100 bar(1,450 bar) maximizing the clamping force on the fixture.

⑤ Spindle Cooling Unit (More than 12K standard) **OPTION**

The cooling unit is installed within the side of the machine to minimize the installation area.

The application of the inverter type, $\pm 0.1^\circ$, enables rapid and effective control of the spindle thermal displacement.

unit : mm(in)

Technical drawing of a machine, likely a lathe or mill, showing dimensions in millimeters (mm) and inches (in). The drawing includes a side view of the machine with a central column and two side arms. The dimensions are as follows:

- Overall width: 2805 (110.4)
- Overall height: 2225 (87.6)
- Distance from left side to center column: 1073 (42.2)
- Distance from center column to right side: 1073 (42.2)
- Distance from top of machine to center column: 1200 (47.2)
- Distance from top of machine to right side: 1200 (47.2)

The machine has a central column with a label "520 (20.5) Z-Stroke". The side arms are labeled "2025 (79.7) High-Column : 2225 (87.6)".

KF Series
VERTICAL MACHINING CENTER

unit : mm(in)

Technical drawing of a mechanical part showing two views: a side view and a top view.

Side View Dimensions:

- Top angle: 60°
- Central hole diameter: $\varnothing 63 (\varnothing 2.48)$
- Height of the central section: $18 (0.7)$
- Bottom hole diameter: $\varnothing 10^{+0.09}_0 (\varnothing 0.39)$
- Bottom hole depth: $6.3 (0.248)$
- Bottom hole diameter: $18 (0.7)$
- Bottom hole diameter: $26 (1.02)$

Top View Dimensions:

- Outer diameter: $\varnothing 48.010 (\varnothing 1.89)$
- Inner diameter: $\varnothing 20 (0.78)$
- Inner diameter: $\varnothing 16 (0.629)$
- Inner diameter: $\varnothing 12.54 \pm 0.04 (\varnothing 0.49)$

SPECIFICATIONS

Specifications

[] : Option

MODEL			KF6700
TABLE	Table Size (L×W)	mm(in)	1,500×670 (59"×26.4")
	Maximum Load Capacity	kg(lb)	1,300 (2,866)
FEED	Travel (X/Y/Z)	mm(in)	1,300/670/635 (51.2"/26.4"/25")
	Rapid Traverse Rate (X/Y/Z)	m/min	36/36/30 (1,417/1,417/1,181) [20K : 30/30/30 (1,181/ 1,181/ 1,181)]
	Distance from Table Surface to SP	mm(in)	150 ~ 785 (5.9" ~ 30.9")
	Distance from Column to SP. center	mm(in)	670 (26.4")
	Slide Type	-	ROLLER TYPE LM GUIDE
ATC	Number of Tools	ea	30 [40]
	Tool Shank	-	BBT40 [12K, 15K, 20K : HSK-A63]
	Max. Tool Dia. (W.T / W.O)	mm(in)	Ø80 [Ø76]/Ø125 (Ø3.1"/Ø3")/Ø4.9")
	Max. Tool Length	mm(in)	300 (11.8")
	Max. Tool Weight	kg(lb)	8 (17.6)
	Tool Selection Method	-	RANDOM
	Tool Change Time	T-T sec	1.4
		C-C sec	3.2 [20K : 3.3]
TANK CAPACITY	Coolant Tank	ℓ (gal)	590 (155.9)
	Lubricating Tank	ℓ (gal)	4 [15K, 20K : 4+2]
	Hydraulic Tank	ℓ (gal)	15 (4)
POWER SUPPLY	Air Consumption (0.5MPa)	ℓ/min(gal)	110 (29)
	Electric Power Supply	KVA	26 [15K, 20K : 32]
	Thickness of Power Cable	Sq	Over 25 [15K, 20K : Over 35]
	Voltage	V/Hz	220/60 (200/50*)
MACHINE	Floor Space (L×W)	mm(in)	3,350×2,529 (131.9"×99.6")
	Height	mm(in)	3,198 (125.9")
	Weight	kg(lb)	9,500 (20,944)

Spindle

Controlled axis / Display / Accuracy Compensation	
Control axes	3 axes (X, Y, Z) 4 axes (X, Y, Z, B)
Simultaneously controlled axes	3 axes [Max. 4 axes]
Least setting Unit	X, Y, Z axes : 0.001 mm (0.0001 inch) B axes : 1 deg [0.001] deg
Least input increment	X, Y, Z axes : 0.001 mm (0.0001 inch) B axes : 1 deg [0.001] deg
Inch / Metric conversion	G20 / G21
High response vector control	
Interlock	All axes / Each axis
Machine lock	All axes
Backlash compensation	± 0 ~ 9999 pulses (Rapid traverse / Cutting feed)
Position switch	
LCD / MDI	10.4 inch color LCD
Feedback	Absolute motor feedback
Stored stroke check 1	Over travel
Stored pitch error compensation	
Operation	
Automatic operation (Memory)	
MDI operation	
DNC operation	Needed DNC software / CF card
Program restart	
Wrong operation prevention	
Program check function	Dry run, Program check, Z axis Machine lock Stored limit check before move
Single block	
Search function	Program Number / Sequence Number
Handle interruption	
Interpolation functions	
Nano interpolation	
Positioning	G00
Linear interpolation	G01
Circular interpolation	G02, G03
Exact stop mode	Single : G09, Continuous : G61
Dwell	G04, 0 ~ 9999.9999 sec
Skip	G31
Reference position return	1st reference : G28 2nd reference : G30 Ref. position check : G27
Single direction positioning	G60
Thread synchronous cutting	G33
Helical interpolation	Circular + Linear 2 axes (Max.)
Feed function / Acc. & Dec. control	
Manual feed	Rapid traverse Jog : 0 ~ 5,000mm/min (197 ipm) Manual handle : x1, x10, x100 pulses Reference position return
Cutting Feed command	Direct input F code
Feedrate override	0 ~ 200% (10% Unit)
Rapid traverse override	F0% (F1%), F25%, F50%, F100%
Override cancel	
Feed per minute	G94
Feed per revolution	G95
Cylindrical interpolation	G07.1
Inverse time feed	G93
Look-ahead block	20 blocks (AI APC)
Program input	
Tape Code	EIA / ISO
Optional block skip	1 ea
Absolute / Incremental program	G90 / G91
Program stop / end	M00, M01 / M02, M30
Maximum command unit	± 999,999.999 mm (± 99,999.9999 inch)
Plane selection	X-Y : G17 / Z-X : G18 / Y-Z : G19
Workpiece coordinate system	G52, G53, 48 pairs (G54.1 P1 ~ 48)
Manual absolute	Fixed ON
Programmable data input	G10
Sub program call	10 folds nested
Custom macro	#100 ~ #199, #500 ~ #999
G code system	A

Program input	
Programmable mirror image	G51.1, G50.1
G code preventing buffering	G4.1
Optional chamfering corner R	
Polar coordinate command	G15, G16
Scaling	G50, G51
Coordinate system rotation	G68, G69
Auxiliary function / Spindle speed function	
Auxiliary function	M & 4 digit
Spindle speed function	S & 5 digit, Binary output
Spindle override	0% ~ 150% (10% Unit)
Spindle orientation	M19
Retraction for rigid tapping	
FSSB high speed rigid tapping	
Tool function / Tool compensation	
Tool function	Max. T8 digit
Tool life management	
Tool offset pairs	400 pairs
Tool nose / radius compensation	G40, G41, G42
Tool length offset	G43, G44, G49
Tool offset memory C	Tool geometry and wear (Cutter and tool length)
Tool length measurement	Z axis Input C
Editing function	
Part program storage size	1280m (512KB)
No. of registerable programs	400 ea
Program protect	
Background editing	
Extended part program editing	Copy, move and change of NC program
Memory card program edit	
Data input / output & Interface	
I/O interface	RS 232C serial port, CF card, USB memory Embedded Ethernet interface
Screen hard copy	
External message	
External key input	
External workpiece number search	
Automatic data backup	
Setting, display and diagnosis	
Self-diagnosis function	
History display & Operation	Alarm & Operator message & Operation
Run hour / Parts count display	
Maintenance information	
Actual cutting feedrate display	
Display of spindle speed / T code	
Graphic display	
Operating monitor screen	Spindle / Servo load etc.
Power consumption monitoring	Spindle & Servo
Spindle / Servo setting screen	
Multi language display	Support 20 languages
Display language switching	Selection of 5 optional Languages
LCD Screen Saver	Screen saver

Option	
Additional optional block skip	9 ea ☆
Fast ethernet	Needed option board
Data server	Needed option board
Protection of data at 8 levels	
Additional Axis	
Manual Guide i	Conversational auto program
Manual handle feed	2/3 units
Addition of custom macro	#100 ~ #199, #500 ~ #999, #98000 ~ #98499
Tool management function	
Part program storage size	5120m (2MB)
No. registerable programs	Max. 1000 EA
Add. Workpiece	Max. 300 pairs (G54.1 P1 ~ P300)
	40 blocks
AICC II	200 blocks
	400 blocks ☆

Figures in inch are converted from metric values.
The FANUC controller specifications are subject to change based on the policy of company CNC supplying.

CONTROLLER

HEIDENHAIN TNC620 Standard

Axes	
Control axes	3 axes (Opt. : max 5 axes)
Simultaneously controlled axes	3 axes (X,Y,Z)
Least setting Unit	0.0001 mm / 0.0001" / 0.0001 inch [0.00001 mm / 0.0000 ° / 0.00001 inch]
Least input increment	0.0001 mm / 0.000 ° / 0.0001 inch [0.00001 mm / 0.0000° / 0.00001 inch]
Display	15-inch color TFT
Program Memory	1.8GB
Block Processing Time	1.5 ms
Path Interpolation Time	3.0 ms
Fine Interpolation Time	0.2 ms [0.1ms]
Position Control Time	0.2 ms [0.1ms]
Speed Control Time	0.2 ms [0.1ms]
Current Control Time	100 us (5000 hz Standard)
Encoder	EnDat 2.2 (Absolute)
Data interface	
Ethernet	2x1000 BASE-T
USB	USB 3.0 (4EA) / 2.0 (1EA)
RS 232C	115200 baud
Machine Function	
Block	5,000 Block
HSC filters	
Switching the traverse ranges	
Interpolation	
Linear	4축 [5축]
Circular	2축 [3축]
Spiral	
User Function	
Program input	HEIDENHAIN conversational, DIN/ISO
Position entry	Nominal position for lines and arcs in Cartesian or Polar coordinates
	Incremental or absolute dimensions
	Display and entry in mm or inch
Tool compensation	Tool radius in the working plane and tool length
Tool tables	Multiple tool tables with any number tools
Cutting data	Automatic calculation of spindle speed, cutting speed, feed per tooth & revolution
Constant contour speed	Relative to the path of the tool center
	Relative to the tool's cutting edge
Parallel operation	"Creating program with graphical support while another program is being run"
3D machining	Motion control with smoothed jerk
Contour elements	Straight line, Chamfer, Circular path, Circle center, Circle radius, Corner rounding, Tangentially connecting circular arc
Contour approach and departure	Via straight line : tangential or perpendicular Via circular arc
Teach-In	Actual positions can be transferred directly into the NC program
FK free contour programming	FK free contour programming in HEIDENHAIN conversational format with graphic support for workpiece drawings not dimensioned for NC
Program jumps	Subprograms and program section repeats
	Calling any program as a subprogram
Coordinate transformation	Datum shift, rotation, mirror image, scaling factor (axis-specific)
Fixed cycle	Drilling, tapping, rigid tapping
	Peak drilling, reaming, boring, centering
	Milling internal and external threads
	Clearing level and oblique surfaces
	Multioperation machining of straight and circular slots
	Multioperation machining of rectangular and circular pockets
	Cartesian and polar point patterns
	Contour train, contour pocket
	Contour slot with trochoidal milling
	OEM cycle, Engraving cycle

Figures in inch are converted from metric values.
Specifications are subject to change without notice for improvement.

[] : Option ☆ Needed technical consultation

User Function	
Datum tables	Several datum tables for storing workpiece-related datums
Datum management	1 Table for storing reference points
Q parameters programming with variables	Mathematical functions
	Logical operations
	Calculating with parentheses
	Absolute value of a number, constant π , negation, truncation of digits
	Functions for calculation of circles
Programming aids	Functions for text processing
	Calculator
	Complete list of all current error messages
	Context-sensitive help function for error
	TNCguide : The integrated help system
Machining time	Graphic support for programming cycles
	Comment and structure blocks in NC program
Returning to the contour	Calculation of machining time in the Test Run operating mode
	Display of the current machining time in the Program Run operating modes
Programming graphics	Mid-program startup in any block in program, returning the tool to the calculated nominal position to continue machining
	Program interruption, contour departure and return
Program-run graphics, Display modes	2D pencil-trace graphics
	Graphic simulation
Test graphics Display modes	Plan view /projection in 3planes /3D view
	Graphic simulation
CAD viewer	Plan view /projection in 3planes /3D view
	Magnification of details
Parallel secondary axes	Display of standard CAD data
	Compensating movement in the secondary axes U,V,W through the principal axes X,Y,Z
Language (20 Languages)	Including movements of parallel axes in the position display of the associated principal axis (sum display)
	Defining the principal and secondary axes in the NC program makes it possible to run programs on different machine configuration
Python OEM process	English / German / Korean / French
	Italian / Spanish / Portuguese / Swedish / Danish / Finnish / Dutch
Python OEM process	Polish / Hungarian / Russian / Chinese
	Chinese_Trad /Slovenian / Norwegian
Python OEM process	Czech / Romanian / Slovak / Turkish
	Execute Python applications

User Function (Option)	
Touch probe cycles	Calibrating the touch probe
	Compensation of workpiece misalignment, manual or automatic
	Datum setting, manual or automatic
3D-ToolComp	Automatic tool and workpiece measurement
	Compensating form errors of tools
	0.00001 mm / 0.00001" / 0.00001 inch
DXF converter	Load and convert DXF contours
CTC (Cross Talk Compensation)	Compensation of axis couplings
AVD (Active Vibration Damping)	
PAC (Position Adaptive Control)	Position-dependent adaptation of control parameters
LAC (Load Adaptive Control)	Load-dependent adaptation of control parameters
ACC (Active Chatter Control)	Active suppression of chatter
DNC communication	Communication with external PC applications over COM component

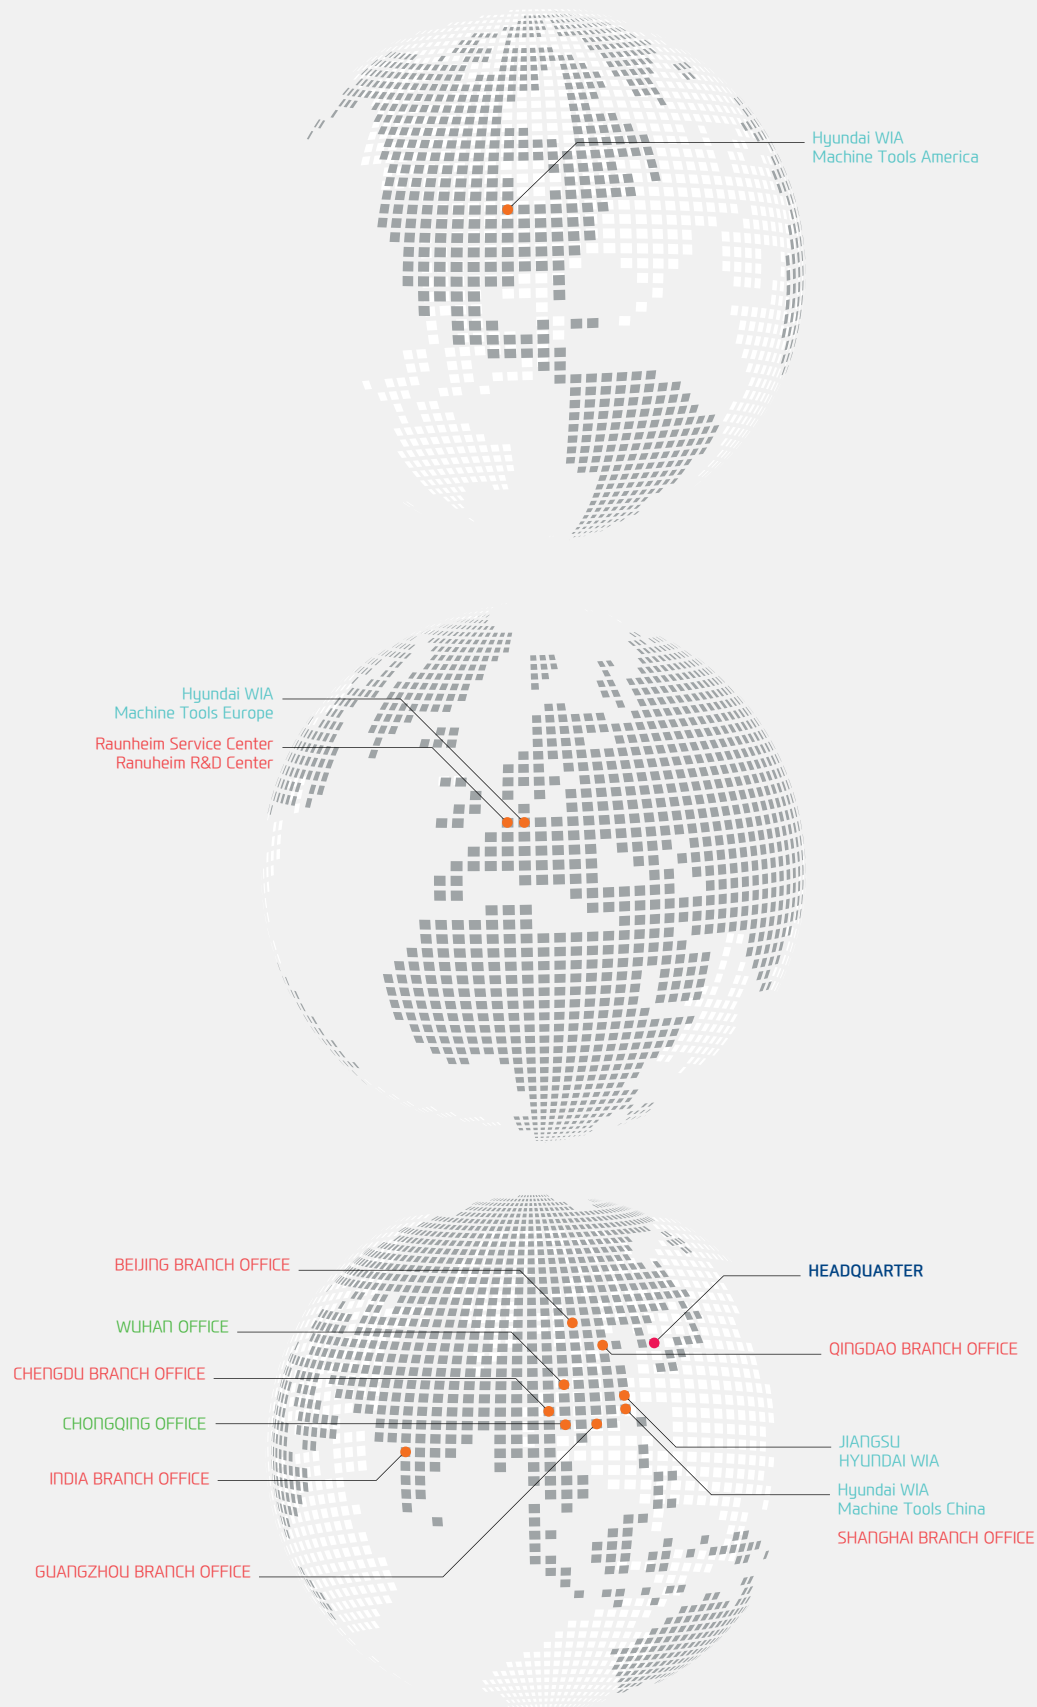

CONTROLLER

HYUNDAI-ITROL

Control & Composition	
Number of axis/Spindles	3 axis (X, Y, Z)
Number of axis/Spindles, max.	6 axis (Axis + Spindle)
Color display	TFT 10.4" Color (800 x 600)
Keyboard	QWERTY Full Keyboard
Part program	1MB, 3MB, 5MB
Addition of part program on CF card	
Transfer Function	
Feedrate override	0% ~ 200%
Transfer value input range	± 999999999
Unlimited rotation of rotation axis	
Acc./Dec. with jerk limitation	
Measuring systems 1 and 2, selectable	
Travel to fixed stop	
Auto servo drive tuning	
Spindle Function	
Spindle override	0% ~ 150%
Spindle speed, max. programmable value ange	1000000 ~ 0.0001
Automatic gear stage selection	
Spindle orientation	
Spindle speed limitation	
Rigid tapping	
Interpolation	
Linear interpolation axis, max.	4 axis
Circle via center point and end point	
Circle via interpolation point	
Helical interpolation	
Non-uniform rational B splines	
Compressor for 3-axis machining	
Advanced surface	
Program Function	
Subroutine levels, max.	11
Interrupt routines, max.	4
Number of levels for skip blocks	2
Polar Coordinates	
Dimensions inch/metric, changeover manually or via program	
Dynamic preprocessing memory FIFO	
Look ahead	50, 100, 150
Absolute/Incremental command	G90 / G91
Scaling/Rotation	
Read/Write system variables	
Block search	
Edit background	
Processing program number, max.	750
Using of CF Card, USB	
Basic coordinate number, max.	1
Work coordinate number, max.	100
Basic/Work coordinate programming change	
Scratching function	
Global and Local user data (GUD/LUD)	
Global program user data	
Interactive cycle program	
Tool Function	
Tool radius compensations	
Tool offset selection via T/D numbers	
Tools / Cutting edges in tool list	80/160, 128/256, 256/512
Monitoring Function	
Working area limit	
Software and Hardware limit	
Zero-speed/Clamping monitoring	
2D/3D protection zones	
Contour monitoring	
Compensation	
Backlash compensation	
Leadscrew error compensation	
Measuring system error compensation	
Feedforward control (Speed control)	
Safety Function	
Safe torque off (STO)	
Safe brake control (SBC)	
Safe stop 1 (SS1)	
Diagnostic Function	
Alarm/Message , Alarm log	
PLC status/LAD online display	
PLC remote connection (Ethernet)	
Automation Support Function	
Actual velocity display	
Tool life management	As time / As amount
Work counter/Cycle time	Embedded
2D simulation	
Manual Operation	
Manual handle/Jog transfer	
Manual measurement of workpiece / tool offset	
Automatic tool/Workpiece measurement	
Automatic/Program reference approach	
Automatic Operation	
Program run as using CF card/USB	
Program control/modification	
Block search	
Reposition	
Preset (Set actual value)	
Data Transmission	
Ethernet network	
USB memory stick & CF card	
Convenience Function	
Processing setting	Coordinate setting, Auto tool length measurement
Processing support	Tool Monitoring, Spindle overload monitoring
Maintenance	Turret Guidance, I/O monitoring, Manual
Maintenance / Management	Soft MCP, Spindle warming-up M/G code list
SMART machining	
Energy saving function (ECO)	
Machine Monitoring System (MMS Lite)	
Language	
Standard support language	Chinese Simplified, English, Korean
Option	
Maximum skip block number	10
DRF offset	
MDI program save/load	
Teach-In mode	
3D simulation	Except for working area/Collision check
Real time simulation	
Shop Mill	Conversational Program
Spline interpolation	
Program remote control in network	
Language	
	Chinese Traditional, French, German, Italian, Portuguese, Spanish

Figures in inch are converted from metric values.
Specifications are subject to change without notice for improvement.
