Excellence EXTREME

***Conforms to relevant
MED and IMO Resolutions*** [page 3](#)

Why perforated design?

Thanks to the perforated surface and the underneath design BERGO has an excellent drainage capability. No puddles! The design with the built-in air gap insulates the surface underneath so the floor is more comfortable to walk on and dries up quickly after rain. This design, which is also profiling, provides a safe, cost-effective and practical solution. Also a practical solution in pool areas!

anywhere - one solution

Bergo Excellence Extreme

A floor that confirms to relevant MED and IMO Resolutions.

Bergo Excellence Extreme features a special material mix of raw material and design providing excellent wear durability. BERGO EXTREME is developed for ship interiors and passenger balconies on mega-yacht, ferries and cruise ships.

Usage areas BERGO EXCELLENCE EXTREME is heavy duty safety flooring ideal for indoor, outdoors and wet areas. It offers slip resistancy in areas such as passenger balconies, pool areas, laundry rooms, engine rooms, freezer rooms, etc.

Performance Attributes

- Environmentally-friendly: BERGO EXTREME is 100% recyclable.
- Heavy duty, slip-resistant and flame retardant.
- Conforms to MED and IMO Resolutions.

BERGO EXTREME, SYSTEM 1-FLOORS (30 x 30 cm) are sound, technical products, designed for professional installers.
Material: Environmentally friendly recyclable UV-stabilised composite. Conforms to MED (B, D) and IMO Resolutions.
Packaging: 5 m² / box = 55 tiles. (180 m² / pallet) or in preassembled sheets (4x3 tiles) = 1,09 m². (81,8 m² / pallet.)

A = Smooth surface. 14 mm.
B = Surface with "knobs". 14,5 mm.

Bergo Flooring AB fulfills the requirements of ISO 9001.

Proudly made in Sweden

Our business area MARINE has flooring specially developed for extremely tough environments on the decks of ships.

Advantages

Flooring is an entire science. When evaluating a deck covering for a vessel, you have to consider factors such as: Installation, appearance, maintenance, cleaning, sound absorbance, durability and removal.

BERGO Excellence is a deck covering which fulfils the requirements for floorings that are exposed to harsh weather, strong sunlight, rain, cold and ice.

BERGO offers a high performance level considering all the above factors and fitting the floor yourself could not be easier, another big advantage.

By installing BERGO you protect the painted deck and prolong the intervals between expensive repainting significantly.

BERGO also has sound absorbing characteristics and it is not essential for the sub floor to be perfectly level prior installation. BERGO offers excellent drainage capability due to the perforated pattern and the underneath design.

Easy to install and move

BERGO Excellence is easy to install. Tapping a rubber mallet or similar over the protruding rings easily interlocks the tiles together. NO fastening, special tools, glue or screws are needed. Use a jig- or circular-saw to cut the tiles for a perfect fit.

Excellence drainage capability

BERGO Excellence allows water and moisture on the subfloor to flow freely, which means that you have a dry attractive appearance and the passengers will not bring in dirt onto the cabin carpets.

In this way you will save time cleaning the cabins, as well as reduce costs, because carpets need to be replaced less frequently.

Disassembly-Tool

BERGO Excellence is tough and takes wear and tear, without losing its attractive appearance. The ingenious design allows for the floor to be moved quickly. The floor can be taken apart by using the disassembly-tool in case a major cleaning job is required. In case one tile is damaged you can change an individual tile by using the replacement-tool.

Accessories

- Edge strips – 300 x 55 mm, for a smart and safe finish.
- Corner strips – 55 x 55 mm.
- Expansion strips – 300 x 75 mm. Expansion Strips will allow expansion of the floor material in varying temperature changes.
- Expansion Cross-piece – 75 x 75 mm, to be used as two lines of the above Expansion strips intersect with each other.
- Disassembly-tool – for easy disassembly and rearrangement.

Easy to install, no fastening, adhesives or special tools are needed.

The tiles lie on top of the subfloor.

BERGO is tough and takes wear and tear without losing its attractive appearance.

Thanks to the perforated surface and the underneath design BERGO has an excellent drainage capability.

In case a major cleaning or repair job is required, BERGO can easily be removed by using the disassembly-tool.

All our products are available in a wide range of colours. See www.bergoflooring.com.

BERGO SPORT FLOOR

Ideal for sports and activities, attracting people to play and exercise during the trip.

BERGO SPORT FLOORS are available in several colours with smart accessories. The excellent drainage capability and special design will give a high usage ratio and the court will bring good economy to the investor with minimal maintenance.

BERGO MULTISPORT with the level of friction provides stop and go characteristics which are perfect for all kinds of sports.

BERGO TENNIS is a well established surface, approved and classified by ITF and the Swedish Tennis Association.

THIS IS BERGO

We have been making flooring for 45 years with one clear objective - to make beautiful, multifunctional flooring.

Really durable floors that work in all sorts of settings. The Eco-friendly production takes place at our factory in Anderstorp, Sweden, without any environmentally harmful emissions. Bergo is active within five business areas: Home, Public, Sports, Marine and Event.

Our export share reaches about 70% to more than 40 countries, making Bergo the world leader in multifunctional floor tiles.

OUR FLOORING

Bergo Tiles are made from recyclable PP-composite.

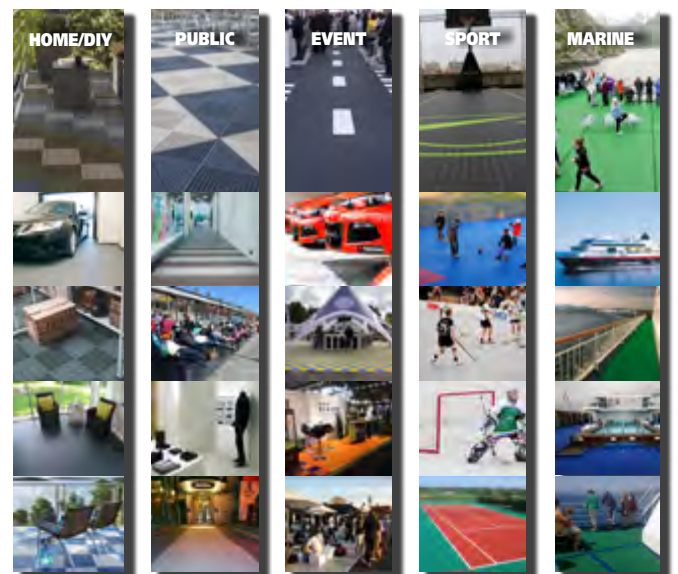

Our floors are installed floating on existing floors without any fasteners.

A Bergo floor solves many problems thanks to the ventilating and flexible design and is particularly suitable for installations on damp surfaces, but also cracked / uneven subfloors and worn wooden decks. Our products are available in a wide range of colours, harmoniously coordinated.

In 2014 Bergo Flooring takes a real step forward as the ECO friendly company with our ECO-range; floors made of 100% recycled PP-composite. When buying one of our ECO products, you take part in our environmental vision and help us to reduce the mountains of waste around the world.

We simply call it - The way to a better world.
