Different printing / coding methods

When you need to print variable data, such as batch numbers, production dates, expiry dates, barcodes, 2D codes etc., it is always a good idea to seek expertise from our experienced engineers. We can help you choose the right and most appropriate and cost effective printing or coding method for your job. We supply machines and solutions with printing and coding technology, such as thermal print, thermal transfer print, laser marking and hot stamp.

Quality and reliability

For us quality and reliability is closely connected, both in our co-operation with you and in the machines we build for you.

Whether if it is a simple dispenser solution or a complete software controlled system, all projects reflect state-of-the-art technology, operational reliability, uncompromising quality and close customer contact – all managed by a professional team of labelling experts.

Labelling Systems Scandinavia – The full range

We deliver the full range from the simple standard label dispenser to the fully automatic labelling solution with integrated software solutions.

We know that labelling equipment has a key position in your production process or logistical supply chain, so it is of vital importance for you in running an efficient production.

- We have a large stock facility of spare parts
- We deliver thermal transfer ribbon for all types of label printers
- Service technicians and service partners based in- and outside of Denmark close to our customers.
- Own software department

About LSS

The huge expertise we have built up through more than 40 years in this area, makes it possible for us to set the highest standards and be the market leader in developing efficient and reliable labelling equipment. Through many years of quality minded work and innovation, we have managed to position ourselves as the leading supplier of labelling machines in Scandinavia.

LSS was created based on the previous labelling machinery division of Avery Dennison. Since 2001 LSS has operated as an independent company, and is today a member of the German Logopak owned by the Possehl Group.
