

_REDUCE TOOL COSTS

The Walter Reconditioning Service.

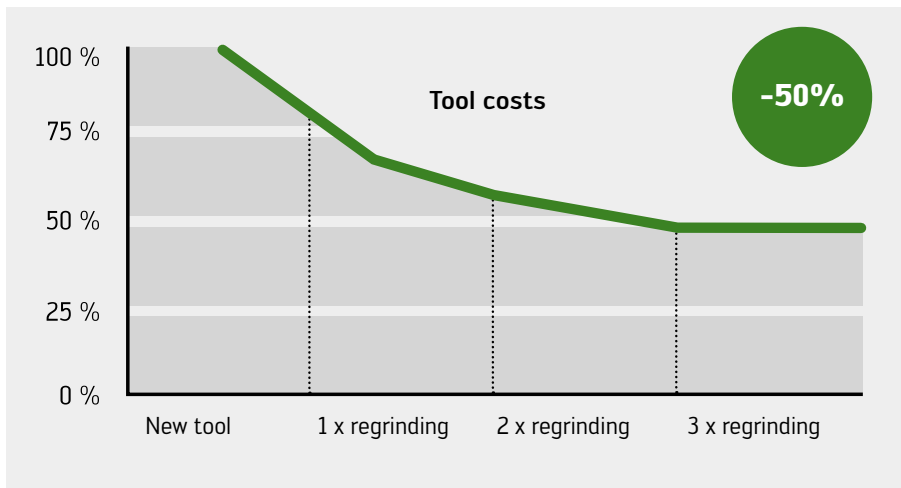

**WALTER TITEX AND WALTER PROTOTYP
MILLING, DRILLING AND BORING TOOLS
IN ORIGINAL QUALITY.**

The Reconditioning Service for Walter Titex and Walter Prototyp tools makes a significant contribution to the reduction of your production costs. On the one hand you receive tools as good as new for approx. one third of the price new. On the other hand, if reground three times you save around 50% of the tool costs – especially in case of high value, high-tech tools.

**This means:
100% original quality, 50% less costs.**

Regrinding & recoating pays off:

Best quality, straightforward processing and punctual delivery.

With the Reconditioning Service you save time and costs and conserve resources. In practice it works like this: you decide which tools need to be reground and place them in our "red box"; we have the box collected and a few days later we deliver your tools back to you in original quality, carriage paid.

- Straightforward processing with standardised delivery note and barcode sticker
- Catalogue tools reground/recoated with original geometry and original coating
- Special tools reground to drawing (price on request)
