

Good vibes only

for the driver and for the passengers!

All febi components included within the Rubber to Metal range have one important function in common – they all reduce noise and vibration to support the most comfortable and safest way of driving a passenger car.

By dampening vibrations, passenger car owners will continuously be satisfied as their vehicle will drive smooth. The result is 'Good Vibes' for the driver and for the passengers as well.

febi Rubber to Metal Components

The Advantages at a Glance

-  Optimal processing for long life
-  Strict quality standards
-  High accuracy of fit
-  Rubber hardness complies with vehicle manufacturer specifications
