

DECLARATION OF CONFORMITY: **(Food grade quality of Compressed air and Nitrogen)**

Filter-Online & Nordic Filtration ApS
Glasvænget 6, 5492 Vissenbjerg
Denmark

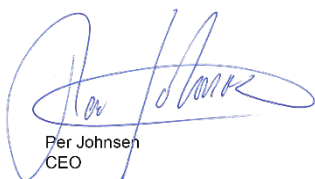

declares that below listed products and components were evaluated and listed as suitable(1) to be used in production and treatment process of Compressed air and Nitrogen when those gasses are subject to comply with the requirements of regulations (EN) 1935/2004, (EN) 1333/2008 and (EU) 231/2012.

Filtration grades:

NP-BE, NP-FF, NP-MF, NP-SMF, NP-AK, NP-SRF, NP-SM, NP-GS, NP-GS(VE)

(1) Please note that compliance of compressed air or nitrogen with the listed EN regulations depends on complete system while listed products and components are just part of the system. Compliance depends on proper combination, sizing and installation of listed products and components and on the fact that they have to be used in proper combination with other essential and compliant equipment (e.g. compressor, pipeline, pressure regulators, sensors ...) which is not manufactured by same manufacturer. General requirements for compressed air used in food sector is described by several regulatory frameworks (e.g. VDMA 15390-2, 15390-1, ISO8573-1, ...). Listed products may contain accessories (e.g. condensate drain, pressure drop indicator, ...) which are not considered as potential source of regulated substances due to location of installation and have therefore been excluded from evaluation.
