World of bending

Compact Bender Stick **C•B•S**

Compakt Bender Stick C·B·S

The Compact Bender Stick C·B·S is a small battery-powered hydraulic press. Weighing less than 10 kg, this universal tool can find its place both in the workshop and at the construction site. The main task of the C·B·S is to move, position parts, straighten or adjust railings or frames, bend tubes, fold flat iron or round material with a force of 8 tons and a stroke of 85 mm. This small press has an incredible number of applications and we are continuously developing them. The C·B·S can perform up to 150 strokes on a single charge. It can be operated vertically and horizontally thanks to its two handles and two control buttons.

Compact Bender Stick C·B·S

... BATTERY POWERED WITH 8T FORCE ...

Voltage:	14.8 V
Pressure:	8 tons
Stroke:	85 mm
Strokes / charge:	approx. 150
Weight:	9 kg
Power supply:	Battery powered

Retract cylinder

Horizontal handle

Vertical handle

Smallest distance 325 mm

Screwing in the extension

Straightening with extension

C·B·S with straightening-bending device

The universal Compact Bender C-B-S can be equipped with a straightening-bending device. The changeover to tube and profile processing is very simple and can be carried out in a few seconds without tools. With this equipment you now have a 15 kg device in your hand which you can use to bend railings and adjust railings at the construction site. But you can also straighten tubes or correct after distortion during welding.

Straightening a top chord

Bending 42 mm tube

C·B·S use on the welding table

The Compact Bender Stick is also of great help when using a welding table. By screwing a clamping bolt onto the C-B-S, it can be positioned anywhere on the table. Thus, parts can be positioned, held, straightened, bent and folded with 8 tons of compression force. But pretensioning before welding can also be easily accomplished in this way.

Pressing frame together

Correcting distortion

We are one of the companies worldwide that offers a wide range of bending machines.
With us you will also receive non-binding advice and thus find exactly what you need!

In the following editions, we will present more machines to you.

We would be happy to send you our complete catalog by post
