FRANKE

OPEN UP NEW HORIZONS

EXOS. the new Franke system line, opens up
new horizons with its accessories and washbasins
for public and semi-public areas.
One line. One system.
One consistent design language, clear-cut shapes,
a high quality standard, modular options for
customised solutions. Sustainability is the key
concept here.

EXOS. by Franke.
One line. One design.
Functionality in perfect harmony.

EXOS. accessories and washbasins combined with the EXOS. Eletronic pillar mixer.

EXOS. ONE LINE

EXOS. by Franke for public and semi-public areas represents the future. For a system that opens up new horizons and combines worlds. The world of accessories and the world of washbasins. The world of functionality and design. For wheelchair accessible, customised areas. Straight lines, sophisticated, timeless. Perfect for every room. Personalised. A perfectly designed system.

EXOS. by Franke.
Perfectly designed architecture in evidence.
Highest quality. Tangible throughout the line.

Consistent design language
The line can be harmonically integrated into any new or existing architectural setting due to its clear-cut, consistent, timeless, elegant design and material.

EXOS. by Franke represents harmony.
Distinctive throughout the line.

Modular functionality
EXOS. accessories and washbasins guarantee optimum design flexibility for architecture and planning. The line is suitable for individual, customised solutions for new or existing public or semi-public areas.

All EXOS. products are modular in design and the system will be constantly expandable and upgradeable: The front panels of the accessories are exchangeable and the operation of the soap dispenser can be changed. The bowls and the length of the washbasins can be selected. Thus the whole line represents a comprehensive range that guarantees maximum reliability and planning flexibility and the highest quality modular range of features.

EXOS. by Franke - there's method in it.
Perfect solutions throughout the line.

Exceptional quality
Well established materials, such as stainless steel, glass and mineral granite are used for EXOS. All EXOS. system components are high quality, easy to clean and durable.
The whole line - from the use of different materials up to modular washbasin designs - takes modern requirements into consideration.

EXOS. by Franke is quality.
Tangible throughout the line.

EXOS. ACCESSORIES

EXOS. accessories by Franke – functionality and performance. Interchangeable fronts made of high quality materials, such as stainless steel and glass, are beautifully designed and can be incorporated individually in any architectural setting. Clear-cut lines. Sophisticated shapes. The timeless design makes for harmonious proportions.

EXOS. accessories by Franke.
Features and design in harmony.

EXOS. accessories
With EXOS. accessories, Franke is setting a new direction: Clear-cut design, modular systems and high quality materials.

By the use of interchangeable fronts in different sorts of materials, such as stainless steel and glass, different room ambiences can be created. Flexibility can also be found in the soap dispenser product group. Here the inner operation can be easily changed from electronic to manual, from liquid soap to foam soap. This is possible at any time, even retrospectively.

EXOS. offers modular flexibility.
Throughout the range.

top left: EXOS. Hygiene waste bin and Double toilet roll holder with stainless steel front and InoxPlus coating, recessed
bottom left: EXOS. Electronic soap dispenser with white glass front

EXOS. WASHBASINS

With EXOS. washbasins, Franke has created a unique,
perfectly designed system line. With an uniform design
language for the whole EXOS. washbasin range.
For both standard and also customised solutions.

EXOS. washbasins by Franke.
For a perfectly designed system application.

EXOS. washbasins
EXOS. mineral granite washbasins stand out because of their universal flexibility
and their modular system. High quality and distinctive design as well as tailor made
functionality can be experienced. The use of high quality stainless steel waste covers
underlines once more the harmony of the system line.

EXOS. washbasins are excellent for any type of solution in standard areas, wheelchair
accessible and customised washrooms. The selection ranges from common standard
sizes up to variable dimensions. The range also stands out because of its different bowl
sizes, washbasin lengths and integrated additional fitting options.

Increased comfort, safety and ergonomics were taken into account in the design,
the dimensions of the worktops, the design of the integrated grab rails and the
deliberate separation of wet and dry areas.

EXOS. offers modular flexibility.
Throughout the range.
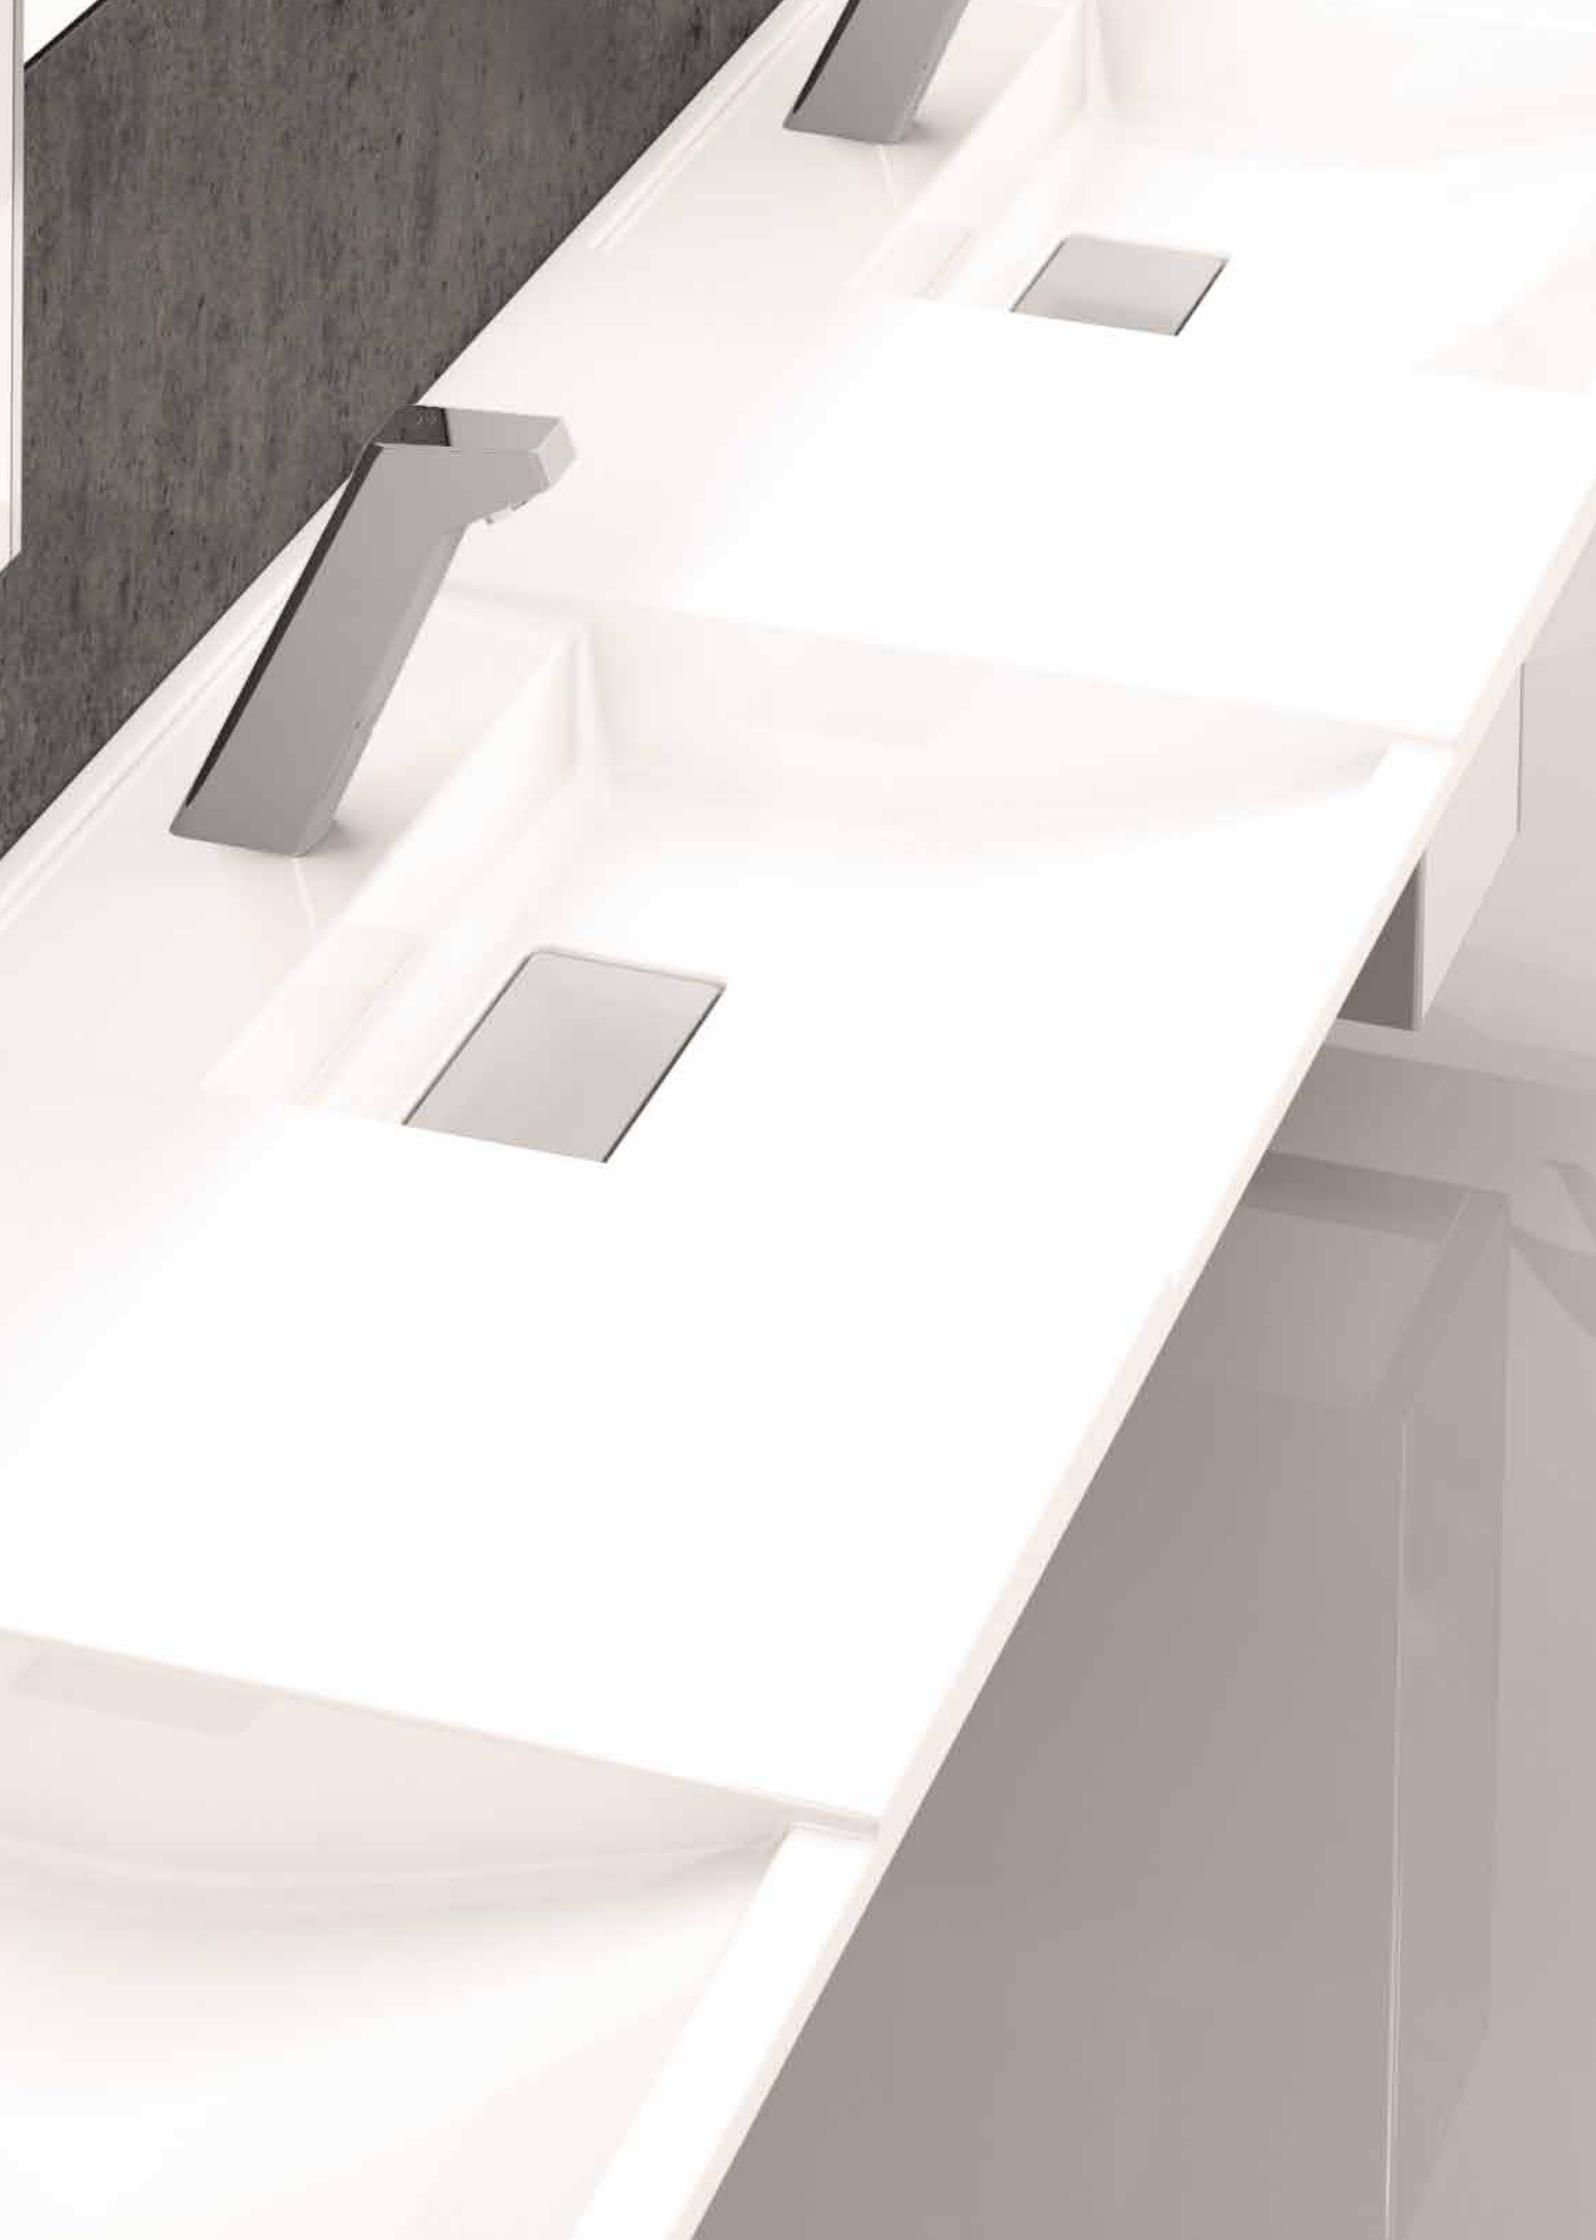

EXOS. MATERIAL

Franke's modular EXOS. system with its range of high quality materials is perfect for any situation. Customised. Modular. In existing or new architectural settings.

EXOS. and its materials.
Sophisticated, high quality, robust, modern, easy to clean and hygienic. Everything well thought out. In one design line.

Stainless steel

The use of stainless steel as a basic material for equipment in public and semi-public washrooms is standard, for good reason. This well established material combines a stylish appearance with functionality and durability.
It can be perfectly combined and can be harmoniously supplemented with materials such as glass and ceramics. Because of its material properties, stainless steel can take on and reflect the colours of its environment. Stainless steel products can easily be integrated into almost any room. This material sets standards.

Stainless steel with InoxPlus refinement

With Franke's InoxPlus surface coating the already easy to clean stainless steel has been approved once more. And so, annoying finger prints which previously often adhered stubbornly to stainless steel now belong practically in the past.

This is a technology where nano particles interlock with the molecules on the metal surface and thus nestle closely against microscopic imperfections. The results are deep finished, easy to clean, fingerprint-resistant surfaces.

MIRANIT

Sanitary equipment made of solid MIRANIT resin-bonded mineral material are eminently suitable for the modern and simultaneously aesthetic design of washrooms in institutions. MIRANIT products made in the truest sense of the word in one piece without bond seams and joins stand out because of their excellent properties - a high level of stability and an elegant look and feel. The smooth, pore-free, hygienic, easy to clean gel coat surface also offers extremely high resistance.

Toughened safety glass

Single glazed toughened safety glass is a material which, like stainless steel, is distinguished by its timeless character and its ability to be combined with other materials. Glass and stainless steel represent high quality and timeless elegance. You can no longer imagine modern room design without these two materials. Therefore, the deliberate combination of the two materials is particularly attractive.

In accordance with safety requirements in washrooms Franke only uses toughened safety glass.

Single washbasin, wheelchair accessible, made of MIRANIT resin-bonded mineral material, with pore-free, smooth gelcoat high-polished surface (temperature-resistant up to 80°C), with integrated grab rails, storage surfaces and integral back panel with integrated brackets for wall mounting. It has a seamless moulded bowl, no overflow and lowered tap ledge with tap hole. Mounting material, strainer waste DN 32, anti-theft device for waste cover with InoxPlus coating included. Colour: Alpine white.

Washbasin: 900 x 125 x 500 mm (W x H x D)
Bowl: 500 x 90 x 340 mm (W x H x D)

ANMW0002 2030020673

EXOS. Multiple washbasin / washbasin solution - Standard

Multiple washbasin made of MIRANIT resin-bonded mineral material, with pore-free, smooth gelcoat high-polished surface (temperature-resistant up to 80°C), with storage surfaces and integral back panel with integrated brackets for wall mounting. The unit has up to 5 seamless moulded bowls, no overflow and lowered tap ledge with tap hole. Variable gaps between bowls, available with/without apron or gel-coated edges. Individual washbasin length up to 3600 mm, with or without splashback. Mounting material, strainer waste DN 32, anti-theft device for waste cover with InoxPlus coating included. Colour: Alpine white.

Minimum dimensions: 600 x 125 x 500 mm (W x H x D) (bowl 380 mm)
Minimum dimensions: 700 x 125 x 500 mm (W x H x D) (bowl 500 mm)

Bowl:
☐ 380 x 90 x 340 mm
☐ 500 x 90 x 340 mm
Number of bowls: .... (min. 1 unit, max. 5 units)

Manufacturing dimension:
Washbasin length: .... mm (max. 3600 mm)
Distance between bowls: .... mm
(min. 600 mm with 380 mm bowl / min. 700 mm with 500 mm bowl)

Splash back:
Rear splash back: .... mm (min. 10 mm / max. 100 mm)

Apron:
☐ Right   ☐ Without apron
☐ Left   (Edges with Gelcoat)
☐ Front
Apron height: .... mm (max. 150 mm)

Holes: for
☐ Soap dispenser   ☐ Waste disposal
☐ Stainless steel waste disposal barrel   with Gelcoat
☐ Waste disposal flap   ☐ Paper towel dispenser
                                    ☐ Hand towel holder

Detailed specifications regarding type of installation and distance between bowls will be clarified when the order is received using manufacturing specifications (available on request from Franke).

ANMW0014 2030032423

Surface treatment for the optimisation of cleaning characteristics (easy to **23** clean) and water drainage as well as the reduction of finger marks.

EXOS. Eletronic pillar mixer

EXOS. pillar mixer DN 15 for sanitary facilities, opto-electronically controlled. For connection to hot and cold water via hoses with integrated backflow preventer and strainers. Control electronics, solenoid valve cartridge, 6 V lithium battery (CR-P2) and sensor in all-metal housing, stainless steel. Temperature lever, chromium-plated, with adjustable, turn-proof temperature stop. Anti-theft aerator, design SLIM, with integrated flow regulator 5.0 l/min. Activated water hygiene flushing 24 hours after last activation, safety switch-off with continuous reflection. With option for parameterization via optional remote control.

EXOS130   2030036618

With 100 - 240 V AC plug-in power supply unit.
EXOS0009   2030036620

Soap dispenser for table top mounting into worktops

Soap dispenser for table top mounting into worktops with max. 45 mm thickness, high polished chromated brass, requires 22 mm drilling hole, G 1 / 2 B thread, spout not movable, spout length 140 mm, suitable for liquid soaps and lotions, 1 litre soap tank with membrane for pressure balance, filled from above.

With standard body length (85 mm)
SD80   2000056721

Electronic soap dispenser for table top mounting

Deck mounted electronic soap dispenser, opto-electronically controlled, to be connected to an on-wall mounted intended unit. The unit consists of a tank for liquid soap, a power supply and a pump unit, including 4 adjustable volumes per sensor operation. Sensor located inside all-metal housing, polished chromium-plated brass. Mains plug-in power supply unit 230 V AC including optional backup battery or external battery operation 6 V DC only (4 x AA, batteries not included).

SD99-010   2030039038

Electronic soap dispenser for wall mounting

Wall mounted electronic soap dispenser for concealed backwall installations, opto-electronically controlled, to be connected to an either on-wall or backwall mounted intended unit. The unit consists of a tank for liquid soap, a power supply and a pump unit, including 4 adjustable volumes per sensor operation. Sensor located inside all-metal housing, polished chromium-plated brass. Mains plug-in power supply unit 230 V AC including optional backup battery or external battery operation 6V DC only (4 x AA, batteries not included).
