Re: New Distributor

It is with great pleasure to announce a new affiliate to the MVP family: Hans Claussen AS. Hans Claussen will officially open on 01 April 2022 and is ready to support all customers for Open Molding, Closed Molding, Adhesives, Automation and much more.

Hans Claussen will take over the distributorship of Rosseland AS, which has been representing MVP for over 10 years. Dag Rosseland, Managing Director, Rosseland AS, was instrumental in growing and supporting customers in the marine, construction, and transportation industries throughout his tenure. His commitment to the customer from sale to installation and technical support will continue with the appointment of Hans Claussen. He will work in partnership with Hans Claussen throughout 2022 allowing for a smooth transition.

Hans Claussen is led by people with over 40 years of combined experience in Composites and Thermoplastics products, and they can streamline the customer's manufacturing process, enhance efficiencies, increase productivity, and improve quality for our customers in Norway and Sweden. They also specialize in providing a 'one stop shop' for resins, fiberglass, adhesives and vacuum bagging equipment and tools.

They will support our customers by carrying a comprehensive line of MVP products and will support on all processes to enhance production. We are very excited about the opportunity to grow the market in Norway and Sweden, so watch this space for more details.

Following is the contact information for Hans Claussen AS:
