

Kota[®] GULVLEDER SYSTEMER

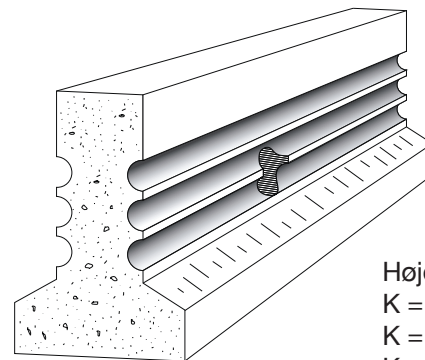

Højde
C = 65
C = 90
C = 115
C = 140
C = 165

Betonleder type C
25 mm galv. jerntop

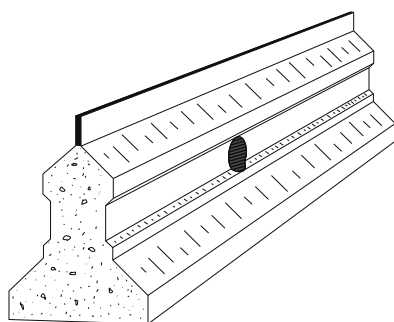

Fugeliste

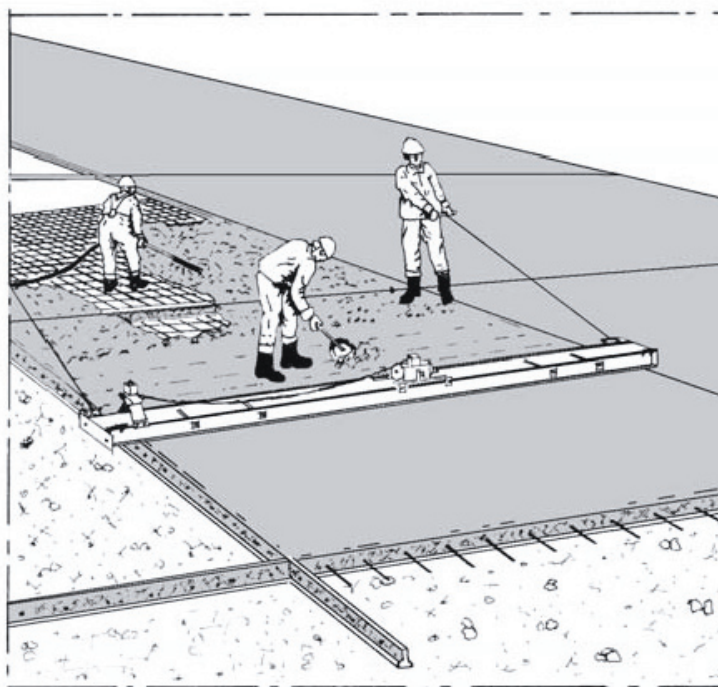

Højde
K = 80
K = 100
K = 125
K = 150

Betonleder type K

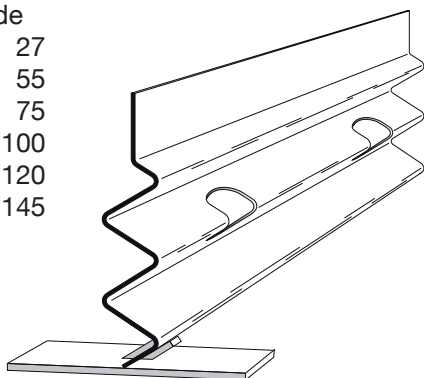

Højde
A = 50
A = 75
A = 100

Betonleder type A
10 mm galv. jerntop

Højde
S = 27
S = 55
S = 75
S = 100
S = 120
S = 145

Stålleder type S

Alle typer er velegnede i forbindelse med:

- afretning af beton
- stor planhed på betonoverfladen
- effektiv fugeløsning
- effektiv inddeling af felter
- stærke fugekanter
- alt i alt = bedre økonomi
- Kota fugeliste kan anvendes til alle typer undtagen K
