Hygienic Line - accessories

NGI is able to deliver all necessary accessories, which ensures a quick and easy installation of the levelling foot, bearing house and castor. Our bolts and nuts are certified in accordance with 3-A (RPSCQC) and EHEDG hygienic standard TYPE EL - CLASS I AUX. The certifications are your guarantee for a optimum hygienic solution as they minimize the cleaning time and water consumption of your equipment due to round-headed and self-draining surfaces with a maximal roughness of 0.8 µm Ra.

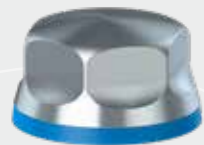

By increasing your focus on the use of hygienic components you are able to minimize the risk of contaminating your production equipment and potentially the end-product. In addition to supplying standardized accessories we are also able to supply customized accessories.

Certified hygienic dome-headed nut - NDXH

- Certified in accordance with 3-A (RPSCQC)
- Certified in accordance with EHEDG hygienic standard TYPE EL - CLASS I AUX
- Minimizes cleaning time and water consumption
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M6-M24
- Are delivered with all certified hygienic machine feet with floor fixing

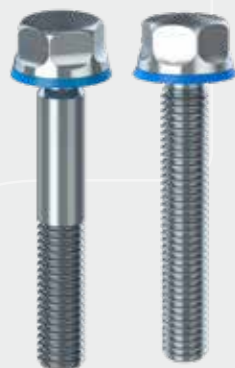

12

Certified hygienic low-headed nut - NLXH

- Certified in accordance with 3-A (RPSCQC)
- Certified in accordance with EHEDG hygienic standard TYPE EL - CLASS I AUX
- Minimizes cleaning time and water consumption
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M5-M24

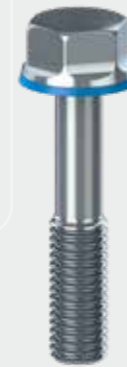

14

Certified hygienic bolt - BXH

- Certified in accordance with 3-A (RPSCQC)
- Certified in accordance with EHEDG hygienic standard TYPE EL - CLASS I AUX
- Minimizes cleaning time and water consumption
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M5-M24

16

Certified hygienic bolt with reduced shank - BRXH

- Minimizes cleaning time and water consumption
- Prevent the bolt from getting loose.
- Easy to mount
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M5-M24

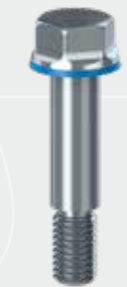

18

Certified hygienic Carriage Bolt - CBXH

- Minimizes cleaning time and water consumption
- DIN 603/ISO 8678 compatible
- Available in sizes M5-M20
- Surfaces with a maximal roughness of 0,8 µm Ra

22

Certified hygienic Fit Bolt - BFXH

- Minimizes cleaning time and water consumption
- DIN 603/ISO 8678 compatible
- Available in sizes M5-M24
- Surfaces with a maximal roughness of 0,8 µm Ra

26

Hygienic handle - UHX

- Minimizes cleaning time and water consumption
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M5-M6

28

Hygienic Line - accessories

NGI is able to deliver all necessary accessories, which ensures a quick and easy installation of the levelling foot, bearing house and castor. Our bolts and nuts are certified in accordance with 3-A (RPSCQC) and EHEDG hygienic standard TYPE EL - CLASS I AUX. The certifications are your guarantee for a optimum hygienic solution as they minimize the cleaning time and water consumption of your equipment due to round-headed and self-draining surfaces with a maximal roughness of 0.8 µm Ra.

By increasing your focus on the use of hygienic components you are able to minimize the risk of contaminating your production equipment and potentially the end-product. In addition to supplying standardized accessories we are also able to supply customized accessories.

Hygienic indexing plungers - IPXH

- Minimizes cleaning time and water consumption
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in the index size 6 and 8

30

Hygienic cable glands - HSK

- Minimizes cleaning time and water consumption
- Available in sizes M12-M32
- Surfaces with a maximal roughness of 0,8 µm Ra

32

Hygienic latch - SLX

- Reduced cleaning time.
- Enhanced food safety
- Plug & Play installation
- Stainless steel and with blue NBR sealings.

34

Hygienic round knobs - XK

- Minimizes cleaning time and water consumption
- Available in sizes M5-M12
- Surfaces with a maximal roughness of 0,8 µm Ra

36

Hygienic star knobs - XK3W

- Minimizes cleaning time and water consumption
- Available in sizes M5-M12
- Surfaces with a maximal roughness of 0,8 µm Ra

38

Hygienic knobs - XKG

- Minimizes cleaning time and water consumption
- Available in sizes M5-M12
- Surfaces with a maximal roughness of 0,8 µm Ra

40

Hygienic welding flange - WFRX, WFSX

- Stainless steel AISI 304/A2, 1.4301
- Squared welding plates
- Round welding plates
- All dimensions available

42

Hygienic Line - accessories

NGI is able to deliver all necessary accessories, which ensures a quick and easy installation of the levelling foot, bearing house and castor. Our bolts and nuts are certified in accordance with 3-A (RPSCQC) and EHEDG hygienic standard TYPE EL - CLASS I AUX. The certifications are your guarantee for a optimum hygienic solution as they minimize the cleaning time and water consumption of your equipment due to round-headed and self-draining surfaces with a maximal roughness of 0.8 µm Ra.

By increasing your focus on the use of hygienic components you are able to minimize the risk of contaminating your production equipment and potentially the end-product. In addition to supplying standardized accessories we are also able to supply customized accessories.

Hygienic spacers - SRXH, SRTXH, SRTFXH

- Secure the approved distance to the support surface
- Blocks out water and bacteria and prevents a non-hygienic metal-to-metal assembly

44

Hygienic adaptor - AX

- Adaptor converts the size and type of the thread and extends the sleeve.

It has blue sealings detectable by scanning systems.

56

Certified hygienic top cover - THOX

- Top cover with blue sealing detectable by scanning systems
- Ensures hygienic covering of the exposed top thread

58

Certified hygienic nuts - NDXH

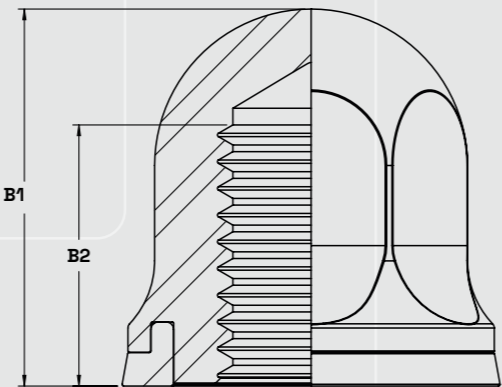

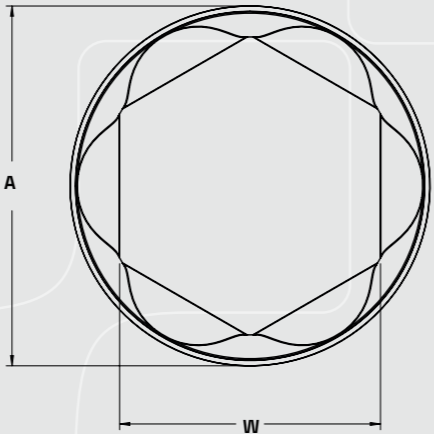

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

Certified hygienic nuts with blue NBR rubber seals is the right choice of nuts to be used on all machinery in all certified hygienic wash-down environments. The NBR rubber seal blocks out water and bacteria and also prevents a non-hygienic metal-to-metal assembly. Round-headed and self-draining surfaces with a maximal roughness of 0.8 µm Ra.

The design of the nuts does not deviate from the sizes of current standard nuts. Therefore, wrench sizes, thread heights etc. all remains the same making it very easy to upgrade and replace standard nuts. NGI's certified hygienic nuts are used for floor-mounting of certified hygienic levelling feet in order to ensure compliance with current legislation towards hygienic design.

The NDXH is used when the length of exposed bolt thread can vary.

- Certified in accordance with 3-A (RPSCQC)
- Certified in accordance with EHEDG hygienic standard TYPE EL - CLASS I AUX
- Minimizes cleaning time and water consumption
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M6-M24

Certified hygienic nuts - NDXH

Certified hygienic bolts with reduced shank - BRXH

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

NGI is now able to offer certified hygienic bolts with blue NBR rubber seals. These bolts are designed with reduced shank, which prevents it against getting loose.

The NBR rubber seal blocks out water and bacteria and also prevents a non-hygienic metal-to-metal assembly.

- Minimizes cleaning time and water consumption
- Prevent the bolt from getting loose.
- Easy to mount
- Surfaces with a maximal roughness of 0,8 µm Ra
- Available in sizes M5-M24

Certified hygienic bolts with reduced shank - BRXH

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

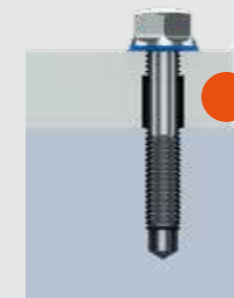

- ✓ Each of the two elements to be assembled is provided with the threaded bore.
- ✓ Both sides or one of them should be provided with a clearance bore, that depends on the design and required clamping length.
- ✓ The clearance bore is important as it facilitates the assembly process and thus reduces the mounting time.
- ✓ The bolt is provided with a shank (reduced shank), that helps to install and disassemble it easily.

Certified hygienic bolts with reduced shank - BRXH

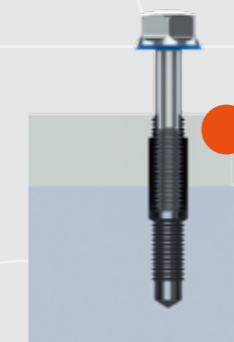

Case 1: Thin plate on a machine frame

It can be used to assemble the thin plate with a machine frame. The thin plate provides a threaded bore necessary to disassemble without losing the bolt.

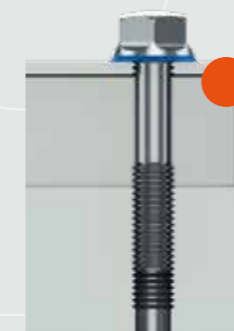

Case 2: Thick plate on a machine frame

An example of this case is the assembly of a thick plexiglass plate with a frame. It is necessary to provide both the thick plate and the frame or one of them, with a clearance bore.

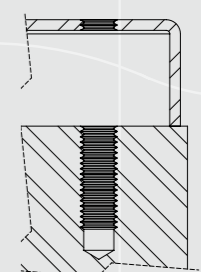

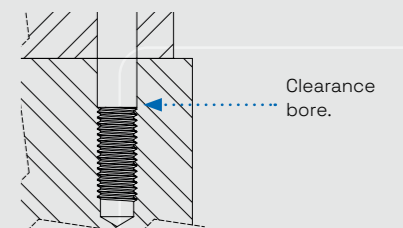

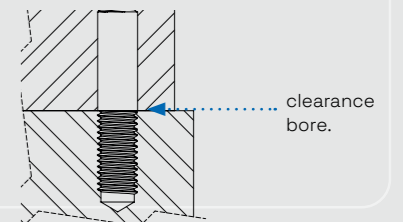

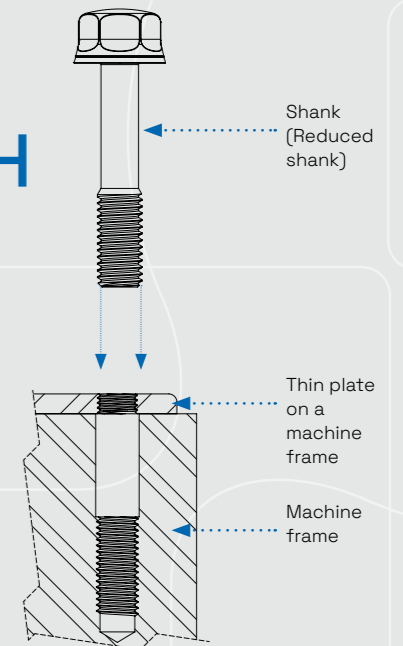

Case 3: Thick plate on a machine frame

An example of this case is the assembly of a thick plexiglass plate with a frame. It is necessary to provide both the thick plate and the frame or one of them, with a clearance bore.

Case 4: Assembling of cover with a house

It can be used to assemble a cover with a house. In this case, the house is provided with a clearance bore. Both cover and house are provided with the threaded bore, which prevent the bolt from getting loose.

Certified hygienic carriage bolts - CBXH

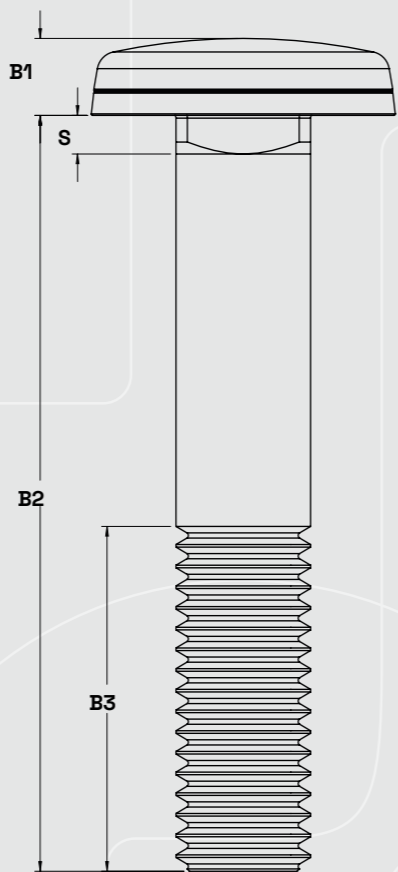

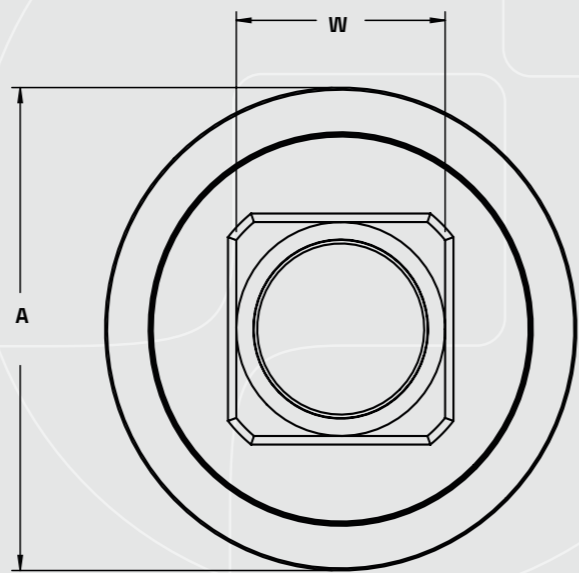

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

NGI is now able to offer hygienic carriage bolts with blue NBR seals. The NBR seal blocks out water and bacteria and also prevents a non-hygienic metal-to-metal assembly.

The bolts have self-draining surfaces with a maximal roughness of 0,8 µm Ra. The design of the bolts is compatible with DIN 603/ISO 8678. Thus, making it a direct replacement.

This is the right choice of bolt to be used on all machinery in all hygienic wash-down environments where space is at a premium.

- Minimizes cleaning time and water consumption
- DIN 603/ISO 8678 compatible
- Available in sizes M5-M20
- Surfaces with a maximal roughness of 0,8 µm Ra

Hygienic handles - UHX

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

With our hygienic handles, we provide:

- Reduced cleaning time.
- Reduced chemical and water consumption.
- Enhanced food safety
- Plug & Play installation
- Hygienic handles made of AISI 304/A2, 1.4301
- Stainless steel and with blue NBR rubber sealings.
- Customer-specific sizes available with short delivery times

Hygienic cable glands - HSK

The HSK Hygienic cable gland is suitable for use in all areas in which the adherence of microorganisms and dirt must be prevented, for example in the pharmaceutical, food and chemical industries as well as in biotechnology and clean room technology.
Material: Stainless steel EN 1.4404 with sealing in WMQ (silicone).

- Reduced cleaning time.
- Enhanced food safety
- Plug & Play installation
- Stainless steel and with blue silicone sealings.

Hygienic latch - SLX

The hygienic stainless steel SLX latch prevents bacterial attack and fulfils the strict regulations of testing principles for foodstuff machinery and hygiene.

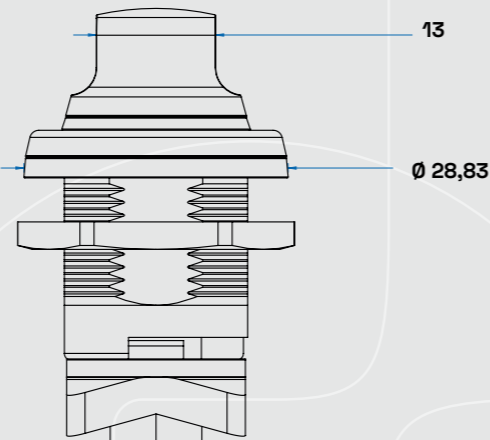

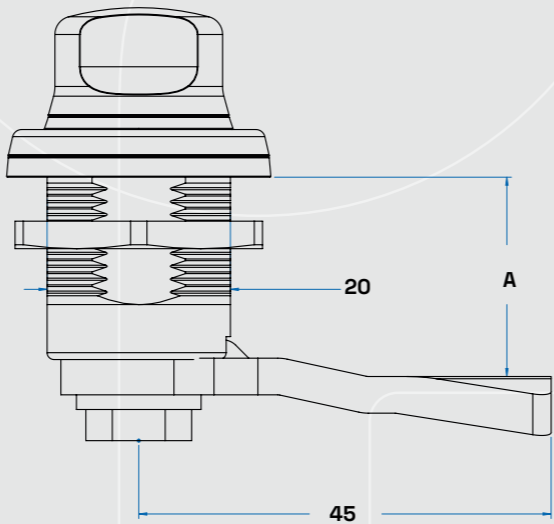

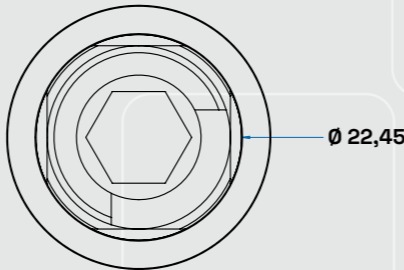

The self-draining stainless steel surfaces with a maximal roughness of 0,8 µm Ra and the central circumferential seal reliably prevent dirt accumulation. Water, cleaning agents etc. can drain off fully and so prevent contamination.

The latch creates a secure closure by rotating a maximum of 90°, which positions the latch in the locked position behind the frame. Material: Stainless steel AISI 316 with sealing in blue NBR.

- Reduced cleaning time.
- Enhanced food safety
- Plug & Play installation
- Stainless steel and with blue NBR sealings.
- Available in many sizes

Hygienic round knobs - XK

NGI is now able to offer hygienic round knobs with threaded pin or internal thread.

The knobs will be available with blue NBR seals. The NBR rubber seal blocks out water and bacteria and also prevents a non-hygienic metal-to-metal assembly.

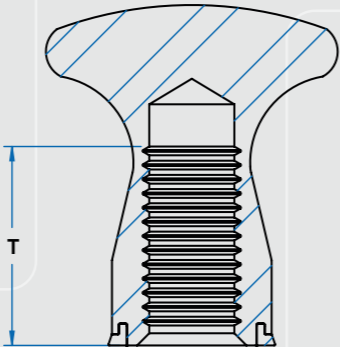

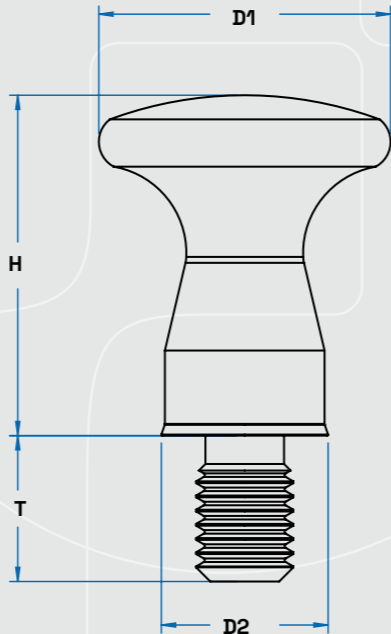

The knobs are made of AISI 304/A2, 1.4301 stainless steel.

The knobs have self-draining surfaces with a maximal roughness of 0,8 µm Ra. This is the right choice of knob to be used on all machinery in all hygienic wash-down environments.

- Minimizes cleaning time and water consumption
- Available in sizes M5-M12
- Surfaces with a maximal roughness of 0.8 µm Ra

Hygienic spacer - SRXH

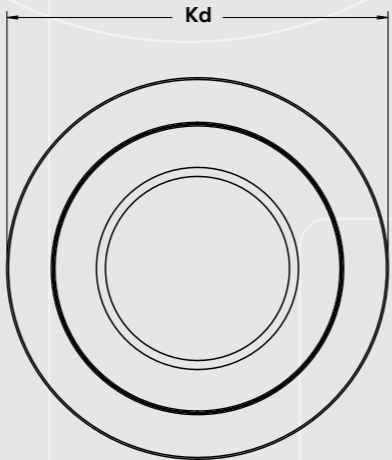

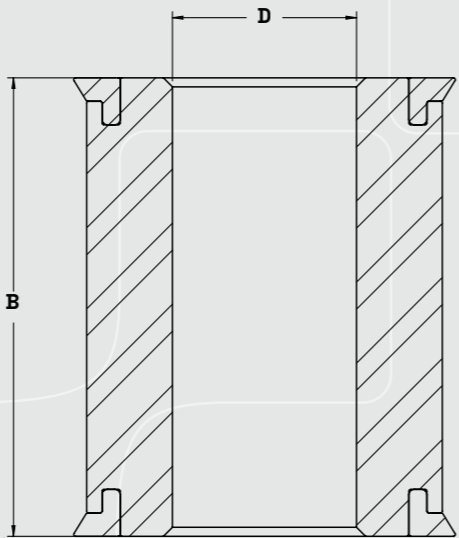

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

We can offer hygienic spacers with blue NBR rubber seals. The NBR rubber seal blocks out water and bacteria and prevents a non-hygienic metal-to-metal assembly.

A high focus on hygienic design ensures that the equipment can be cleaned behind and around all components.

With our hygienic spacers, we provide:

- Reduced cleaning time.
- Reduced chemical and water consumption.
- Enhanced food safety
- Plug & Play installation
- Stainless steel and with blue NBR rubber sealings.
- Customer-specific sizes available with short delivery times

Hygienic spacers

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

Easy cleaning from all angles

A high focus on hygienic design ensures that the equipment can be cleaned behind and around all components. All transitions and connections between materials are hygienically sealed with blue sealings.

Hygienic spacers

NGI offers hygienic spacers to increase the distance to machines and equipment to over an inch as recommended by USDA.

Installation

The installation is easy and a plug & play solution and you will be able to use your usual procedure.

Certified hygienic spacers for bearing houses

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

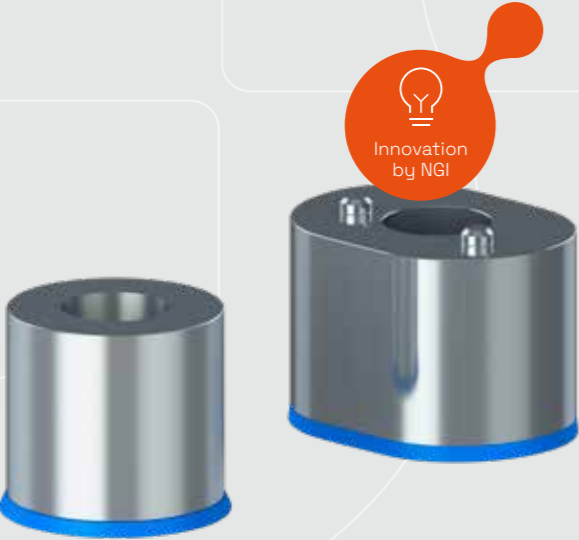

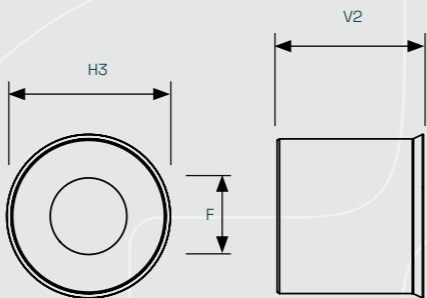

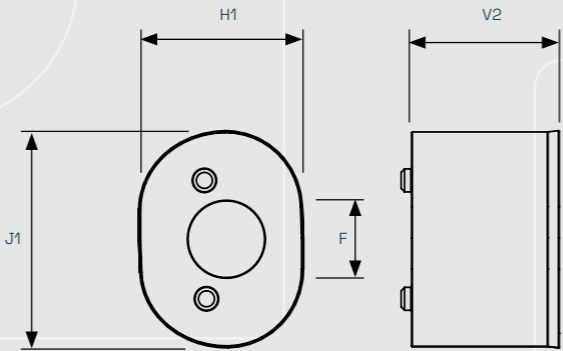

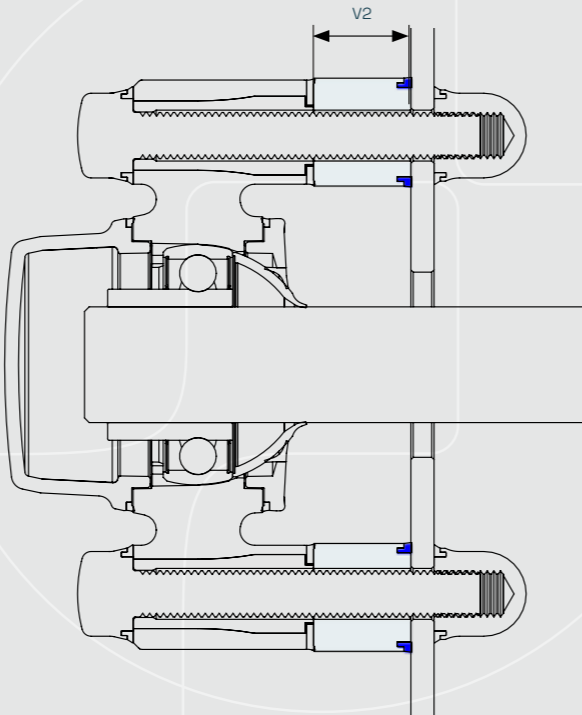

NGI can offer certified hygienic spacers with blue NBR rubber seals. The NBR rubber seal blocks out water and bacteria and prevents a non-hygienic metal-to-metal assembly.

A high focus on hygienic design ensures that the bearing house can be cleaned behind and around the shaft and furthermore, NGI offers hygienic spacers to increase the distance to machines and equipment to over an inch as recommended by USDA.

NGI bearing houses are USDA certified.

When USDA laws are to be followed use the hygienic spacers from NGI to secure the approved distance to the support surface. For hygienic components from NGI which are already 3-A RPSCQC approved, USDA has mostly been about protection against visible threads and 1" spacers for bearing housings.

To attach NGI hygienic bearing houses to the support surface always use NGI certified hygienic bolts or nuts to secure the overall hygienic design.

Certified hygienic Bearing houses with spacers

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

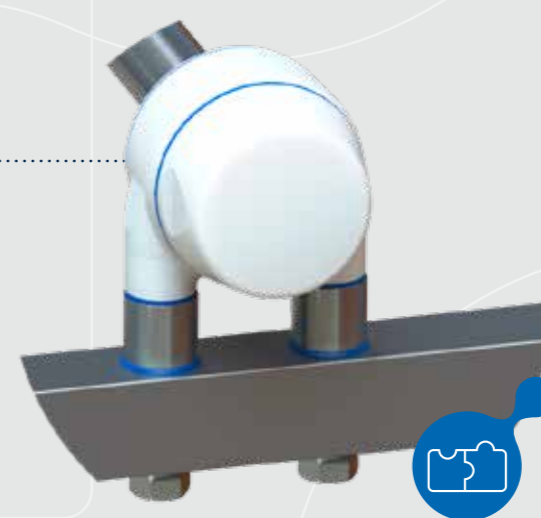

Easy cleaning from all angles

NGI has created a bearing house that is extremely easy to clean from all angles as water can easily reach all surfaces. All transitions and connections between materials are hygienically sealed with blue sealings.

Hygienic spacers

A high focus on hygienic design ensures that the bearing house can be cleaned behind and around the shaft and furthermore, NGI offers hygienic spacers to increase the distance to machines and equipment to over an inch as recommended by USDA.

Installation

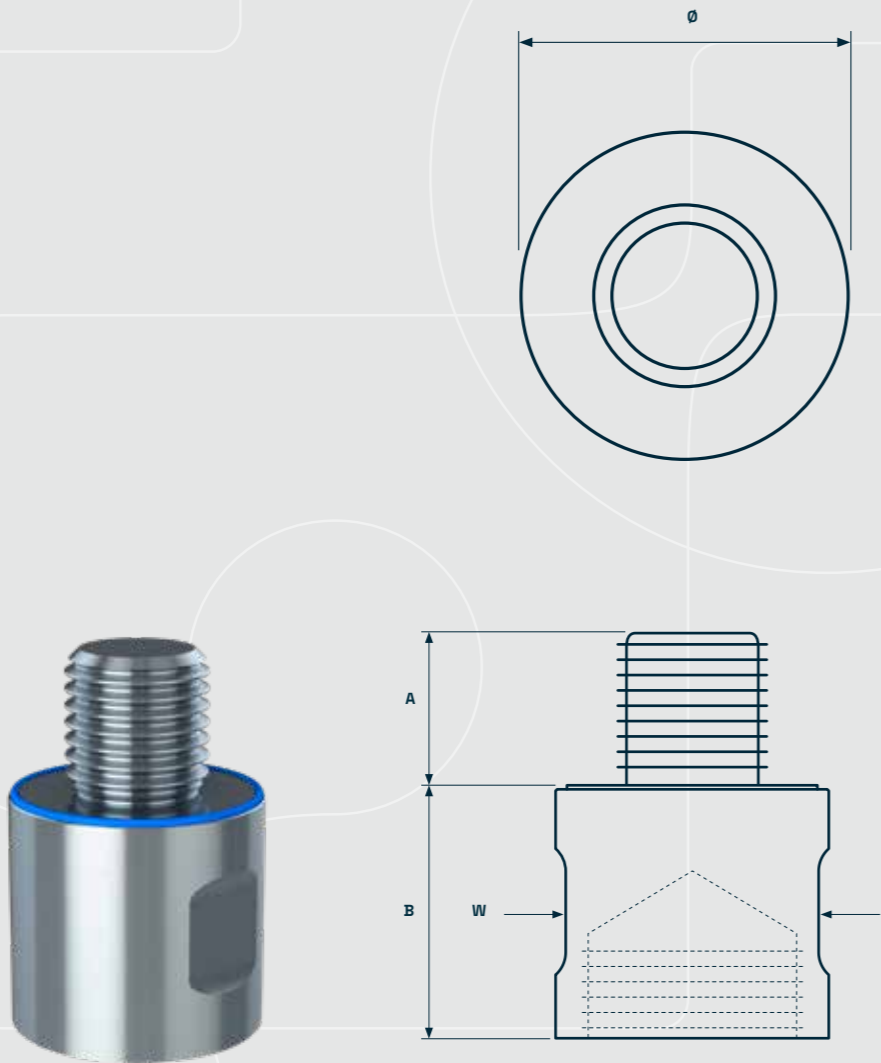

Installation is easy and you will be able to use your usual procedure, however, as the bearing can be turned inside the house and covers are replaceable, the bearing house from NGI is far more flexible and can be mounted in more ways than traditional bearing houses.

Hygienic adaptor - AX

The thread adaptor is an add-on for the XHFV & ZHFVJ system. It converts the size and type of the thread and extends the sleeve. Furthermore, it is equipped with blue sealings detectable by scanning systems.

Available in customized sizes.

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

Certified hygienic top cover - THOX

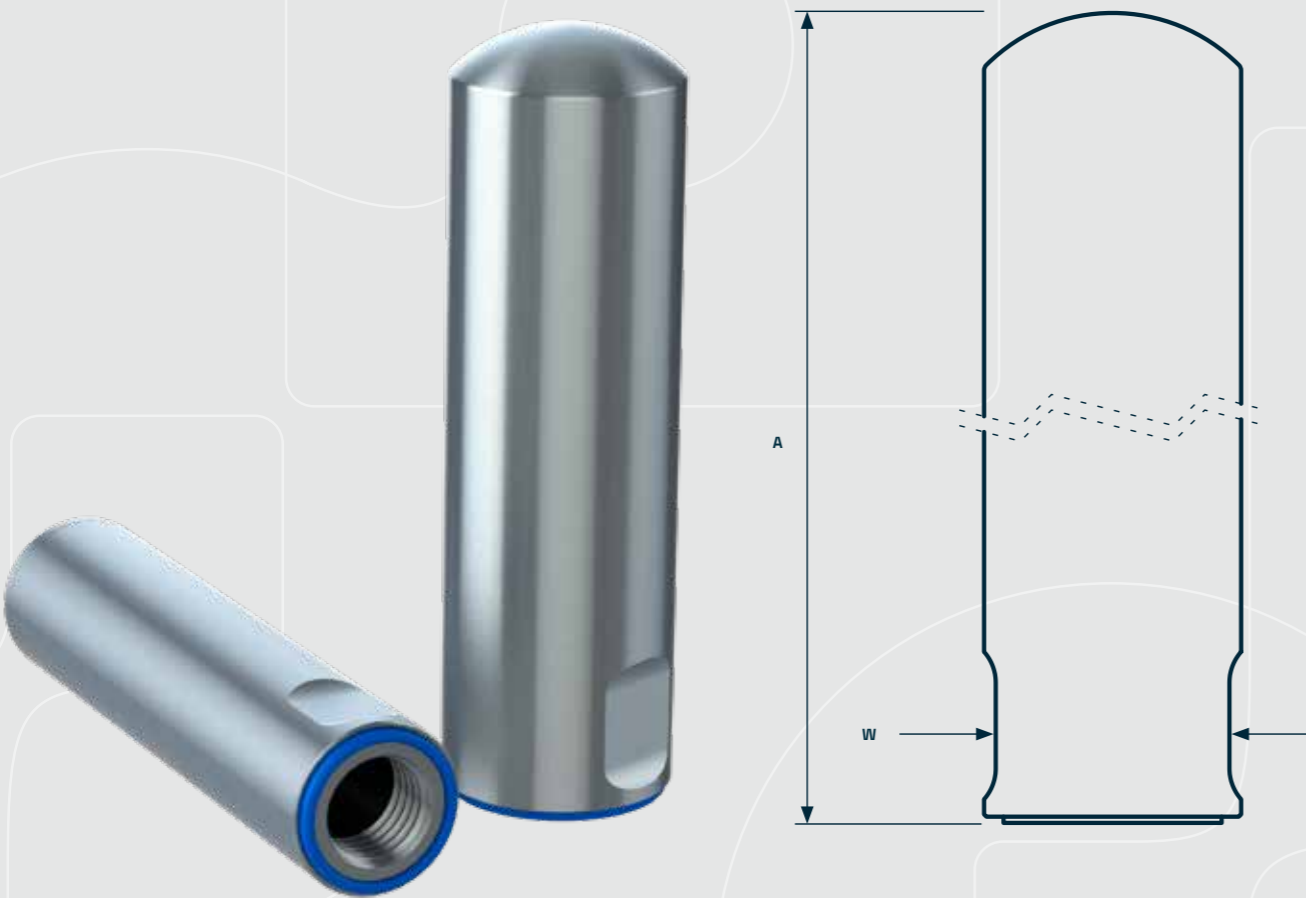

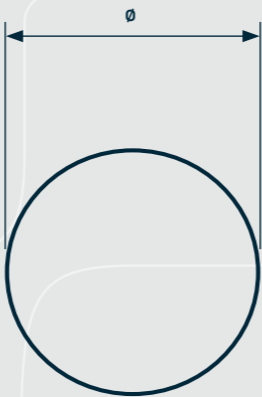

-  Certified hygienic
-  Minimized cleaning time
-  Minimized water usage

The top cover is designed to be used in situations where the top of the thread is exposed, which compromises the hygienic performance and certification of the levelling foot.

By applying the top cover the exposed thread is hygienically covered. The top cover can also function as counter nut.

The top cover is supplied with a blue sealing detectable by scanning systems and minimum cleaning effort is obtained due to the self-draining design.

Available in standardized and customized dimensions.

Certified hygienic top cover - THOX

Product Innovation

Innovating for tomorrow
Investing in research & development

NGI Innovation - the Sustainable Way

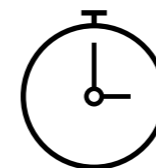

Stainless steel - Recyclable materials

80% of our products can be recycled. We are working on initiatives to make this percentage even higher.

Hygienic seals - Resource saving

Permit easy cleaning and reduce water consumption.

High Quality - Longer lifetime

Our products are very high quality which means they have a longer lifetime than corresponding components.

Hygienic design - Protecting consumers

We make sure that the components do not constitute a hygiene risk through innovative and uncompromising design.
