

## Northern Graphics

Northern Graphics ApS is a Danish agency company with focus on sales and consulting. We mainly operate within the Food and Pharmaceutical Industry in Scandinavia.

Our main customer segment has production activities involving extrusion, lamination, printing and converting.

We are also represented in Sweden by our daughter company - Svenska Northern Graphics AB. Northern Graphics therefore considers Scandinavia as its geographic home market with representation of market-leading manufacturers of machines and equipments.

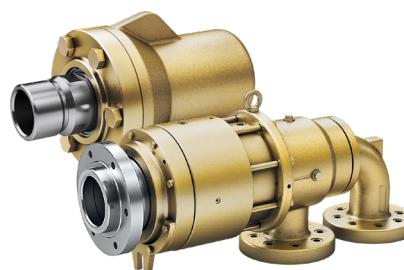

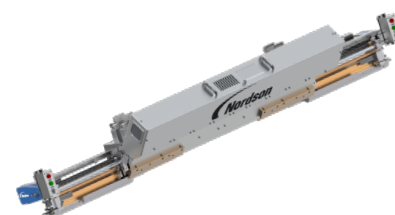

## Equipments

**Antistatic equipment from SimcolON**  
Effective removal of static electricity with our ionization equipment.

**Rotary joints including sensor technology from Chistian Maier**  
Transfer fluids between stationary and rotating components: solutions for air, steam, oil, or other specialized mediums.

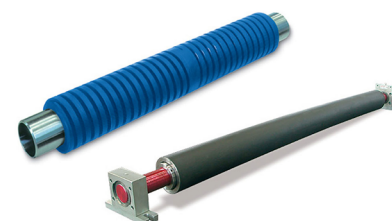

**Extrusion Die Solutions from Nordson EDI**  
Optimize production processes with high-performance precision die technology for sheet, film, coating, and laminating.

**Air shafts and chucks**  
From standard expanding air shafts to fully customizable core chucks.

**Idle rollers**  
Minimize friction, improve material flow, increase production speed. Tailored to specific customer needs.

**Spreader rollers**  
Used for many different applications and comes in customized lengths and diameters.

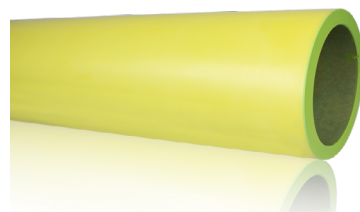

**Cutting modules and systems**  
Used for paper, cardboard, spundbond, nonwoven, geotextile, packaging, rubber, aluminium, film, various laminates etc.

**Top slitter knives / multiblock bottom knives**  
Widely used cutting tool in the paper industry for tasks such as cutting, shearing, perforating slitting.

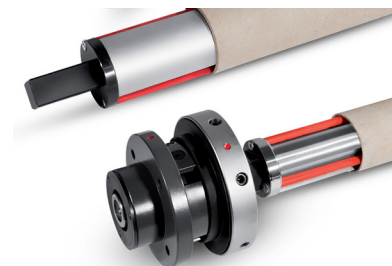

**Cold air guns from Vortec**  
Often used for cooling of metal parts, in the machining and repair of metals, plastics, wood, ceramics etc.

**Flexo Printing Sleeves from Tech Sleeves**  
Up to 40% lighter - Extremely durable inner core made of Dyneema and vinyl ester resin.

**Friction shafts**  
Specially designed for slitters to handle constant tension on multiple slit.

**Safety chucks**  
Secures core shafts in place and guarantees roll security during winding processes.

## Machines

**AV Flexologic**  
*We innovate!*

**Plate mounting machines from AV Flexologic**  
Machines designed for mounting and prepress equipment by providing the most advanced and fastest flexo solutions for optimizing the pre-press workflow and eliminating bottlenecks.

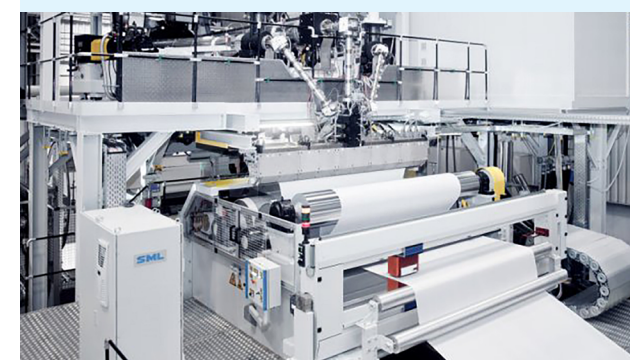

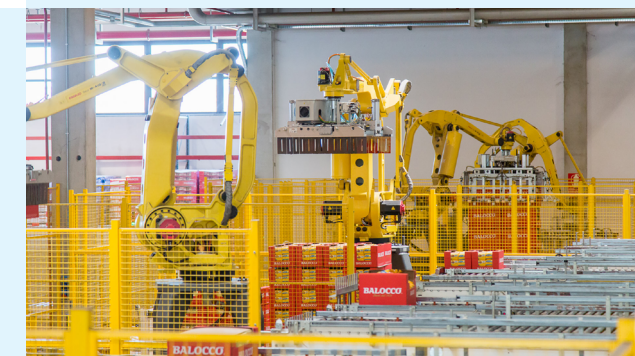

Italian Leader Worldwide  
**EUROMAC**  
SLITTERS REWINDERS

**Slitters from Euromac**  
High tech machines for cutting plastic films, paper, aluminum and other food packaging materials.

**Trascar**  
AUTOMATION • LOGISTICS

**Fully automatic roll handling machine from Trascar**  
Create automatic palletizing systems, transport systems, automatic industrial warehouses, picking and shipping solutions.

**Core cutting machines**  
For cutting cardboard and plastic tubes in different lengths. The machines are offered as manual, semi-automatic and fully automatic with and without magazine.

**SML**

**Stretch film line from SML**  
Range from: cast film lines, sheet lines, coating lines and winding technology. Provides a clear edge in performance and productivity.
