

### Measure distance without an analog output

Measurement data from discrete sensors

### Reduce downtime and operator error

At-a-glance operator guidance  
and status indication

### Complete plug-and-play solution

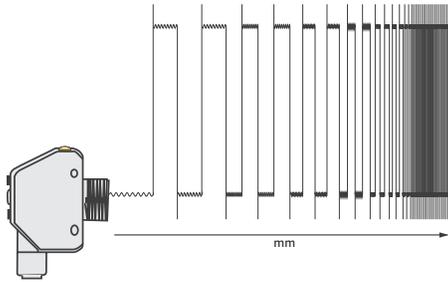

Multiple indication and smart sensor  
solutions available

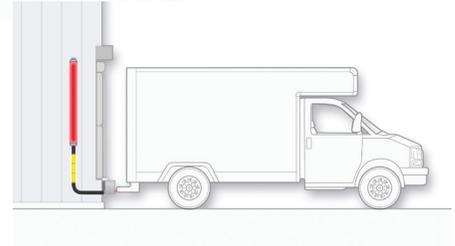

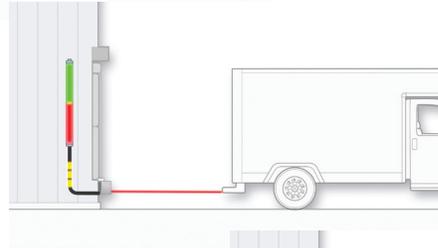

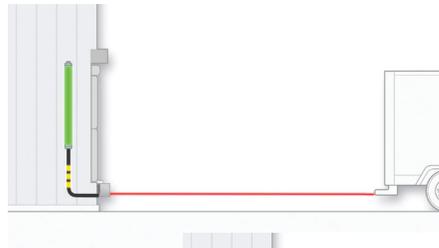

# Banner Pulse Pro I/O™

Gain actionable measurement data from a discrete sensor with ease.

Pulse Pro enables a discrete sensor with PFM output to function like an analog sensor with real time measurement and positioning data

Pair a Pulse Pro enabled sensor and indicator to improve visual communication and reduces the risk of costly mistakes and accidents

Utilize technology built into Banner's smart sensors and Pro Lights to visualize incremental changes in precision applications or direct operators of large machines and equipment
