

## **TUNGSTEN CARBIDE BURRS HPC** for casting, steel and stainless steel

With the tungsten carbide burrs HPC (high performance coating) TYROLIT opens up a new level. The newly developed geometry of the cutting edges ensures the longest possible lifetime and the best results on all types of steel. Plus, the tungsten carbide burrs are equipped with a state-of-the-art coating that not only makes them even stronger, but also creates a smoother surface. This improves chip transport considerably.

# Tungsten carbide burrs HPC

for casting, steel and stainless steel

HPC tungsten carbide burrs are produced on modern CNC grinding machines. The result is a highly efficient precision tool that achieves optimum grinding results.

The combination of new, unique geometry and state-of-the-art coating technology creates unrivaled productivity, with the stock removal rate doubled compared to other Premium tungsten carbide burrs. Even the unparalleled colour combination of the coating is unique to TYROLIT.

## The benefits at a glance:

- + With the longest possible lifetime thanks to newly developed geometry on the cutting edge
- + State-of-the-art coating technology for a stronger and smoother milling head
- + Up to twice the stock removal rate compared to other premium class tungsten carbide burrs
