# JUNIOR PATRON FILTER

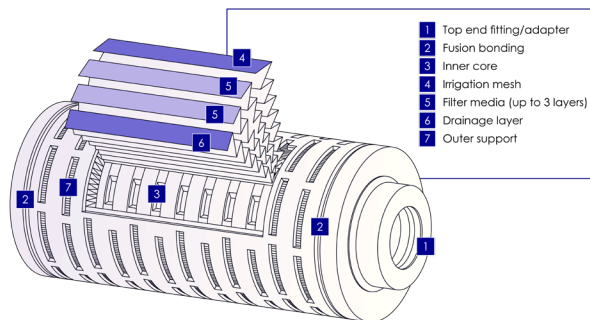

Junior

When compressed air or liquid is used as a catalyst in a mixing process, or used for instruments, ingredient or a number of high requirement applications, where the particle control is critical, a junior filter is a simple and cost efficient solution for use with absolute or membrane filtration.

The filters are amongst the smallest types on the market, allowing easy installation in machines or in limited spaces.

This versatile filter type is available in stainless steel, polypropylene or PVDC plastic. All 3 materials are available with pipe thread or clamp connection, allowing applications in sterile or sanitary situations, as well as electronics, solvents, ultrapure water, or even paint, ink and coatings.

## Technical Data

- Polyethersulphone
- 0.04 0.1 0.2 0.45 0.65 1,2
- 99,999999%
- 60°C
- 5" 10" 20" 30" 40"
- Code 7 (others available)
- EPDM (others available)
- 

## Applications

- Small-scale biopharmaceuticals
- Ophthalmic solutions
- Electronics and semiconductors
- Small-scale fine chemicals
- Pilot-scale studies
- Point-of-use water supply

## RECOMMENDED FILTER HOUSINGS

## ABOUT US

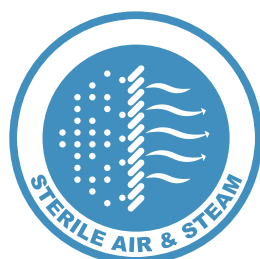

Ultrafilter Scandinavia offers a wide selection of filtration products for compressed air, liquids and gas. We have stock in Denmark and from here we distribute all of our products to Scandinavia and the Baltic countries.

Ultrafilter Scandinavia is a part of the Ultrafilter group. Our production facility is in Germany and we have several subsidiaries in Europe and the United States.

You can buy our products on local websites. Information about our products as well as brochures and manuals can be found on our website ([www.ultra-filter.com](http://www.ultra-filter.com)).

We can adapt all of our filtration products to your needs, and we offer visits from our consultants in order to find the right solution for you. We also offer on going service on our products once they are installed.
