Fischer MiniMax™ Series is designed for handheld or body-worn applications

Connect² Innovation: Unmatched Pin Density, Size and Performance

The new Fischer MiniMax™ Series increases the performance of your ruggedized devices, handling more mixed signal and power connections, while saving space, weight and costs.

Product Features and Your Benefits

Save space by more than **40%** and solve miniaturization challenges of your devices.

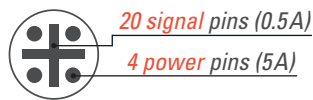

- Space-saving receptacle with ultra-low profile

3 times more compact*

Save money by packing more signal and power into smaller devices.

- Unique combination of 24 mixed pins

3 times more contacts*

* Compared with Fischer Core Series size 104 with closest pin count.

Reliable connections for your ruggedized devices

- Durability more than 500 mating cycles
- Salt water spray corrosion resistance: 1,000 hours
- Mechanical and visual coding for improved safety

Expertise in sealing performance perfectly adapted for your underwater applications

- Waterproof to 120m
- Sealing even unmated

Complete Solution

Complete interconnect solution saves you time and money

The Fischer Minimax™ Series includes pre-cabled plugs and pre-wired receptacles, overmolding and protection caps. Choose **push-pull**, quick release or screw-lock connections.
