

SEAMLESS INTEGRATION AND **MORE** PRODUCTIVITY

MAZATROL SMOOTHX

Yamazaki Mazak's SmoothX is the seventh generation of its MAZATROL CNC. A revolution in machine tool control, it is the culmination of a 10 year development programme with three major objectives: to offer maximum ease of operation, reduce machining times and further integrate CNC into the overall factory management system.

▶ Ergonomically designed control panel with angle easily adjusted to suit the varying height and posture of the operator.

▶ New intuitive touch-screen Graphical User Interface (GUI) panel with intelligent keyboard and Windows 8 gestures for moving, zooming, scaling and rotating the 3D display.

▶ New '3D Assist function' provides direct import of 3D CAD to the CNC reducing programming time eliminating errors from manual input.
