Baykal

READY 4.0 CHANGE

From Past to ***Future***

With a foundation history going back to early 1950s, Baykal today is placed as a leading manufacturer and global supplier of sheet metal working machinery specialising in the production of press brakes, shears, notchers, punching machines, laser cutting systems, plasma cutting machines and Vertical Machining Center.

For its manufacturing operations Baykal utilises three factories which together combine a production area of 60,000 square meters, making it one of Europe's largest facility for sheet metal working and fabricating machinery. The total workforce at Baykal is currently numbered at 650 employees and is composed of highly trained and qualified machine operators and assembly technicians supported by a staff of 50 engineers. All the machines offered by Baykal are designed, manufactured, assembled and finished at Baykal's purpose-built plants in a CAD environment with extensive use of CNC machining and modern workshop equipment.

Baykal Company is accredited for the ISO 9001 Certification issued by the German TÜV institution. Also, since 1995, Baykal has been building machines in conformity with the European CE regulations for safety, being the first Turkish machine-tool manufacturer certified eligible to bear the CE Mark on its products. In addition, all Baykal products are manufactured with the TSE and TSEK quality certificates issued by the Turkish Standards Institution.

Since the last 40 years Baykal has progressed to become a major exporter of sheet metal working machines to the world markets with customers located in all the machine-tool consuming countries of the global geography from Americas to Australias. Baykal is currently represented in over 100 countries worldwide through appointed dealers. In the base market of Turkey, Baykal sheet metal working machines have traditionally commanded a leading market share thanks to the company's pioneering role in the development of Turkey's machine industry and its never-lessening emphasis on quality and service. Here, with a long engineering experience behind, Baykal wishes to present itself as a quality-conscious, professional machine-building company serving the industry.

BLE - Pro

Cost Efficient and Economical

01

PRODUCTIVE

High dynamism increases productivity on thin sheets (+20%) compared to conventional drive system.

02

ACCURATE

Precise and repeatable in cutting and laser head positioning thanks to the effective CNC management. Excellent cutting quality and dynamics on all materials.

03

MODULAR

Suitable for any production need, offering a full range of solutions for automation.

04

USER FRIENDLY

Automatic nozzle changer and easy to use programming software.

05

PROFITABLE

Low operating costs and reduced maintenance.

COST EFFICIENT LASER CUTTING MACHINE

BAYKAL Laser Cutting System:
New BLE-Pro Fiber Laser.

LESS FACTORY SPACE AND LOGISTICS.

The whole machine can be packed in one 40OT container, which lets the investor to save up with the cost of transportation and with place in the workshop.

VERSATILE DESIGN

Huge opening front doors with windows are useful to monitor the working area inside of the machine.

BLE PRO 1530

ADVANCED CUTTING HEAD

The New BLE-Pro can cut a wide variety of materials with different thicknesses coming up with a result of excellent quality at the highest possible speed.

THE LATEST GENERATION IN LASER CUTTING

The new PRECITEC ProCutter 2.0 generation impresses with its increased performance.

Baykal

BLE PRO 1530

SMART FUNCTIONS AND INDUSTRY 4.0

New BLE - Pro can be automated
and is ready for Industry 4.0

ACCURACY

The welded steel frame construction of the compact NEW BLE - Pro minimises deformation caused by high acceleration and ensures overall machine accuracy.

PRODUCTIVITY

Excellent cutting quality for sheet metal
from the thinnest to the thickest.

UNIQUE GANTRY

The gantry is sturdy, not compromising on quality of stiffness and durability of the machine.

MORE CONVENIENT

The roof of the machine can be opened manually.

MORE STABLE AND FASTER AUTOMATIC PALLET EXCHANGE

The machine maximises uptime with an integrated shuttle table system that allows one table to be loaded/unloaded while cutting on the other table.

BAYKAL AUTOMATION

Tower Compact - Automatic Loading and Unloading for BLE-PRO

USEFUL FUNCTIONS

Auto Nozzle Cleaning | Auto Nozzle Changer | Nozzle Centering

NEW GENERATION CONTROL UNIT

New generation, user friendly
BECKHOFF CNC with 18,5" LCD
multi-touch screen.

EASY OPERATION WITH BAYKAL CUTTING DATA

BAYKAL cutting data for the all related materials is already included in the machine, which makes operating much easier for all materials and sheet thicknesses.

**BAYKAL HMI:
THE MOST ADVANCED
- VERY EASY TO USE**

Baykal made interface makes your work easier and ensures you to get best results.

LightCutter 2.0

FLEXIBLE

The LightCutter 2.0 is the ideal solution for all laser cutting applications in the medium power range up to 6 kW. Thanks to its wide range of variants - you will always find the most efficient and economical configuration. It is characterized by high cutting qualities for all metals up to 25 mm sheet thickness - especially for laser cutting of mild steel, stainless steel, and aluminum.

MPRECI TEC

ProCutter 2.0

Focal Length Adjustment:
Manual or motorized via machine control

Focusing Lens:
High quality optics | XY adjustment | no repositioning | additional protective glass below focusing lens

Protective Glass Cartridge:
Protecting the optics against dirt and fume | monitoring of attendance and contamination | tool free, easy change

LED Bar :
For immediate display of the current system state (pressure, temperature, drive, contamination)

Distance Measurement :
Fast, exact, drift free distance measurement at any operating temperatures, even at high accelerations

External Interface:
Output of all sensor data as an analog value, readout the values via Bluetooth set of thresholds

Protective Glass of Collimation Unit

Cut Monitoring:
Monitoring of piercing process and detection of cut interruption

Mounting of the head:
Easily accessibility from the front

A SAFER METHOD

The sliding front opening door is equipped with a magnetic safety lock.

HI-DESIGN SAFETY PROTECTION COVER BOX

New BLE-Pro has a cabin structure designed in accordance with CE standards.

OPTIMUM PERFORMANCE

Equipped with high torque BECKHOFF servo motors and high precision reducers.

MADE IN
GERMANY

INTELLIGENT FUNCTIONS

Interior camera provides an excellent overview of the entire working area – with complete safety.

BLE F

MANUEL SCRAPS COLLECTOR

BLE-Pro Fiber Laser has comfortable and practical scrap collectors that are removable by roller units, which allow for better and easier cleaning.

BLE PRO 1530

MORE SAFE

New BLE-Pro turns maximum protection
into maximum productivity.
