Jern-Maskinindustrien

Jern-Maskinindustrien is for everyone who wants serious insight into the Danish industrial sector and to be at the forefront of an ever-changing industry.

We write about and for professional players who all have one thing in common: a deep-felt interest in industrial production, whether as a metalworking subcontractor, a machine manufacturer, or a machine builder. Jern-Maskinindustriens trade magazine focuses on new trends, technologies, and opportunities, but also the challenges the industry faces. We bring interviews with

the industry's top people and deliver inspiration, solutions, knowledge, market insight, and key figures to our readers.

Jern-Maskinindustrien also consists of various special sections and special publications.

Among these you will find:

- Who's Who in the Iron and Metal Industry
- The Industry's Top 100
- Danish World Class

Target group & statistics

The background is a solid dark blue. It features several thin, white, curved lines that sweep across the frame. One line starts from the left edge, curves upwards and then downwards towards the bottom right. Another line starts from the top left, curves downwards and then upwards towards the right. A third line starts from the top right and curves downwards towards the bottom right. These lines create a sense of movement and flow.

Facts about Jern-Maskinindustrien

Jern-Maskinindustriens newsletter is sent out daily to over **19.300** people within the industry and has around **103** member companies who actively use the portal in their everyday lives.

The companies are located throughout the country and evenly vary by company size.

The users and the newsletter recipients are characteri-

zed by being decision makers – i.e. primarily directors, purchasing managers, production managers, and sales managers. Additionally, salespeople and buyers use our newsletters to stay oriented about their customers and suppliers.

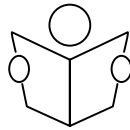

Our newsletter recipients are all relevant recipients. We regularly contact all key people in the industry by phone, to ensure we hit the right target audience with our news-

letter. There is an ongoing change in the recipients of the newsletters in connection with job changes and the like.

We regularly unsubscribe recipients if the newsletter bounces back.

Editorial Sections and Content

Insight - Background - Perspective in the Iron Machinery Industry. Jern-Maskinindustrien is aimed at everyone who wants a serious insight into the Danish industrial sector and wants to be at the forefront of an industry that is constantly changing.

We write about and for professional players who all have one thing in common: a deep-felt interest in industrial production, whether as a metalworking subcontractor, a machine manufacturer, or a machine builder.

Jern-Maskinindustriens trade magazine focuses on new trends, technologies, and new opportunities, but also the challenges the industry

faces. We bring interviews with the industry's top people and deliver inspiration, solutions, knowledge, market insight, and key figures to our readers. Jern-Maskinindustrien also consists of a number of special sections and special publications.

Among them, you will find:

- Who's Who in the Iron and Metal Industry
- The Industry's Top 100
- Danish World Class

of Jern-Maskinindustrien's readers are between 50-59 years old

2. Section

Focus and Immersion

In each publication, Jern-Maskinindustrien has an extra focus on a current theme, where we go one step deeper into that particular topic.

Machining:

We focus on the latest technologies within metalworking, like turning and milling, where we follow developments within CNC machines and cutting tools.

Sheet metal processing:

We focus on cutting, bending, and joining in the form of welding, riveting, etc. Here you can read about the development of fully automated plate processing in the form of e.g. laser cutting and punching.

Welding:

We focus on new trends in welding. Here you can read about the latest developments in robotic welding, about welding in stainless steel and welding in thick materials.

Green transition:

The green transition is no longer only a conversation piece within the industry. Now there is action and investments are being made in energy optimization, recycling, and other initiatives that lower CO2 emissions. Under the theme "Green transition" we write about the latest developments and inspire companies to take further steps toward sustainability

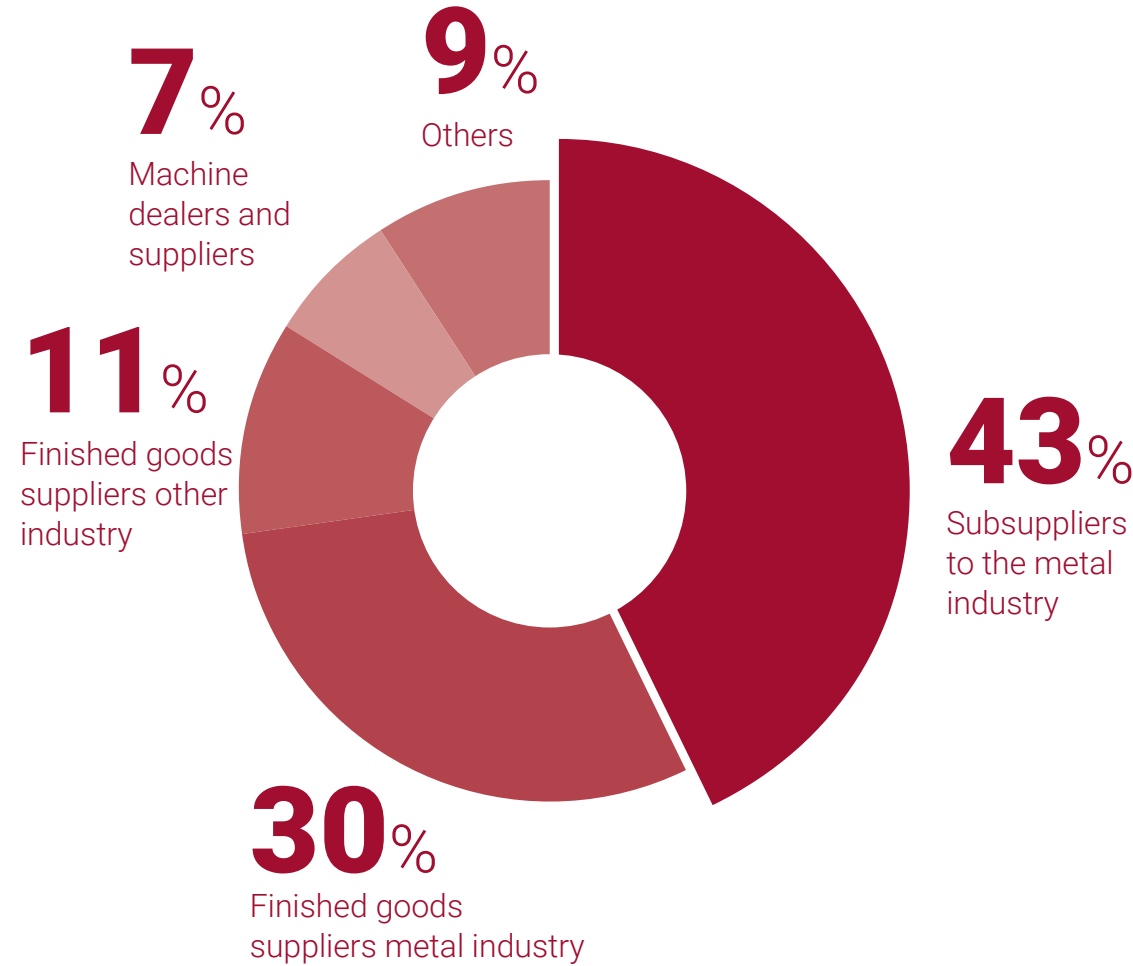

- Machine shops
- The supplier for the Iron and machine industry
- Automation houses
- Process plants

Machine Focus

Automation, Process and Technology

Automation of the future

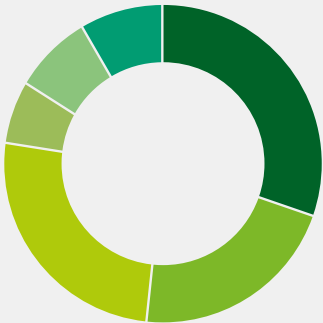

The newsletter is sent to decision-makers mainly in the metal industry, but also to the wood industry, the food industry, and the energy sector.

The decision-makers include production managers, factory managers, directors, and others who influence the decision-making process.

Furthermore, it is sent to machine manufacturers who use automation equipment in their machines.

Published 20 times in 2023. Published on Fridays; odd weeks.

Discounts

Contact us for a good deal if you wish to order more ads. Please see the contact information on the last page.

The material formats are scaled down slightly to the magazine format.

All prices are ex. VAT, unless otherwise stated. We reserve the right to printing errors and price adjustments.

See in the back for technical specifications and conditions.

Banner advertising on the front page

Our website is responsive and adapts banners to display correctly on all screens.

The banners share space with up to 3 others. However, title banners stand-alone, while sticky banners share space with up to 2 others.

The banners rotate when changing pages.

All banners can be either static or animated – HTML5, gif, or script – except the title banner.

Animated banners come in the following formats: .jpg, .gif, .png or HTML5.

* Sticky banners, corner page banners, and side banners are only displayed on the desktop.

The prices assume that you are a member company at the medium.

See in the back for technical specifications and conditions.

- ✓ Help to insert news from your website on our media.
- ✓ Help to insert the relevant keywords.
- ✓ Yearly coordination to ensure maximum output of your membership.
- ✓ We make the set-up for Market overview of the companies you want to follow.

Technical specifications - Online

Deadline

The deadline is agreed upon with the graphic designer, who forwards the booked advertising campaign, specifications, and the deadline.

Delivery of finished material

The deadline for delivering finished material is two working days before start-up. Advertisement incl. a link to the landing page is sent directly to the e-mail: online@nordiskemedier.dk

Graphic assistance

If you need a graphic designer to help with your design, there are the following requirements for images, logos, and text.

- Images must be min. 80 DPI in the file formats .jpg, .tiff, .eps, .psd and .png.
- Logo and graphic elements are delivered as .eps or .ai vector graphics.
- The text is sent separately in a .docx format or the email with the material.

We must receive your material for production no later than ten days before the start advertising campaign.

When banners are ordered and reserved for two months min., we prepare the banners

free of charge, otherwise, the price is DKK 500 per banner.

Banner Advertising

Banner Advertising

Our website is responsive and adapts banners to display correctly on all screens. Please note that banners are readable on different screens.

The banners share space with up to 3 others. However, title banners stand-alone, while sticky banners share space with up to 2 others. The banners rotate when changing pages.

All banners can be either static or animated – HTML5, gif, or script – except the title banner. Animated banners come in the following formats: .jpg, .gif, .png or HTML5.

Specifically for HTML5 banners

When delivering HTML, use a zip file with the entire source material. The zip file must be max. 10 MB.

HTML5 files that stay within a frame of 20 seconds are at an advantage. HTML5 files are only used for banners on the portal, as the file type does not work with email pro-

grams. If HTML and script banners are not made responsive, we need a fallback banner for use on mobile and tablet screens.

Guidelines for Advertisers

It must be clear to the readers what content is advertisements and what is editorial articles. Therefore, advertisements must differ in layout – both on the portal and in the newsletter, not to mislead readers into thinking that an advertisement is an article.

In general, we ask advertisers to use a font other than ours. On the website, the word "Advertisement" appears automatically just above the banner, but when advertising in the newsletter, the word "Advertisement" should appear at the top of the ad so that it is not beyond any doubt that it is an advertisement - we then follow the legislation in the area.

If we consider the advertisement too close to the editorial texts, we will request to change the font and/or add the company logo, making it clear that it is an advertisement.

We do this to comply with the rules drawn up by the Consumer Ombudsman. Further-

more, you must only market for your own company and products - i.e. no misleading or bad mention of the competitors - to comply with the Marketing Act.

Technical specifications - Print

Material

Send material to: materiale@nordiskemedier.dk

Compensation

Material allowance by agreement, however max. 5%.

Cancellation conditions

Cancellation and date changes must be made in writing no later than 14 days before the publication date.

If changes in the insertion schedule mean that the conditions for obtained discounts are not present, the wrongfully paid discount will retroactively be debited.

Rep

If Nordiske Medier does not receive fully finished advertising material, we invoice 50 øre per mm. for completing the material.

Formats

Newspaper format	Tabloid
Column height.....	365 mm
1 column	41 mm
2 columns	86 mm
3 columns	131 mm
4 columns	176 mm
5 columns	221 mm
6 columns	266 mm
